

Good Day! :D

This is a step to step guide to enable Commercial MQL5 EAs on VPS using Environment Changer.

-if you want to enable EAs such as Perfect score, ProFX, SFE, Grid Hero, SharkeA, Belkaglazzer, North East, etc. etc.

-First of all please understand that you'll need to modify your VPS environment in order for this Robots to work

note*that only Few VPS are supported

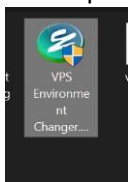

VPS Tested and Working includes (Beeks Clouds, Vultr VPS, Alibaba and Tencent Cloud)

-I recommend user to test his personal VPS first if it is supported by following he below instructions.

-VPS which are not working Amazon VPS, Google Cloud, ForexVPS, FXVPS, myForexVPS

-Please follow instructions to test you're VPS

Step 1 copy/paste VPS Environment Changer.exe on VPS desktop

Double click and open the VPS Environment Changer.exe on the VPS desktop

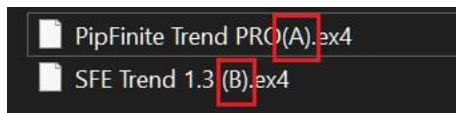

ComputerName	F9D585ACD7A5DD9	Internet Explorer ID	E1441-E1441-53DB9-4A51D
ProductID	00486-001-0001076-84927	SID	S-1-5-21-6164072593-6164072593-6415447
ProductKey	FF3DD-60967-60967-671F6	Windows PFN	Microsoft.Windows.125.X19-36699_8wekyb3
InstallDate	1508836742	ContentID	544224CD-4FF3-6C56-F23C-AE18DE5E73D5
SystemBIOS	[COMPATIBLE] [4/21/36] [ALASKA]	InstalledKey	90270-97BD1-FA497-5DBC3
BoardBIOS	[COMPATIBLE] [4/21/36] [ALASKA]	HardwareConfigID	{3EEE05FF-CAE4-3060-4E90-A111493575C9}
DeviceID	{36707755-60CE-5D93-D1F7-92452E9D63F7}	BoardManufacturer	Asus Technology Co., Ltd
WUDeviceID	0DB6E2D7-1C93-C68F-0800-F647A4CC470C	BoardProduct	Surface Pro 4
UserID	A4A675023F29	SystemManufacturer	BIOS Technology Co., Ltd
CrypMachineGUID	A4A67502-3F29-47F5-443E-7D0AD8195154	SystemProductName	7370-1B01
CKCLGUID	{E8410167-7C7D-A5E4-D9C0-5D08B2C13941}	PartSerNumber	7CC31A9A
HardwareGUID	{BDAAB486-D112-3B89-C8CA-EF125E5A3CD1}	NetworkCardMAC	C4-D4-34-A5-A5-AC

Replace Product ID with 00477-001-0000421-84639

Replace PartSerNumber with 0CC0174F

Then Click OK

Note* that Mql5 EAs shared support two different types of environments divided by (A)sign and (B) sign at the end, you have to choose one environment to use. You can use both See example below

If you want to Enable EAs with (B) sign use the following codes below

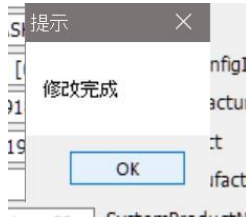

- Fill in only A and B in the with the following codes below to use EAs with (B) sign

A. ProductID - 00477-001-0000421-84639

B. PartSerNumber - OCC0174F

- Then click ok

-A Small window will popup

Click ok again wait or restart VPS.

If you want to Enable EAs with (A) sign use the following codes below

A. Product ID - 00486-001-0001076-84927

B. PartSerNumber - 7CC31A9A

If EAs can't be attach after Modification Environment this means that you're VPS is not supported So I'll recommend you to try Beek VPS is free if you have ICMarket Account

<https://secure.icmarkets.com/Vps> or follow Step 2

Step 2

Visit and Register with Vultr VPS and use the given link below

In order to receive free \$100 to test VPS,

<https://www.vultr.com>

-open the link and create Account

-fill in details

-select link Card you will not be billed anything since you have free credit

And they is no automatic billing if your credit runouts you have to manually recharge it for VPS to work again.

-choose cloud compute

-select Server Location of your choice

-Select the Server Type - (64bit OS Windows 2012 R2 x64)

-Choose Server Size - of your choice

-Deploy Now

Then repeat step 1 again on Vultr VPS
