## **RISK DISCLOSURE STATEMENT / DISCLAIMER AGREEMENT**

Trading any financial market involves risk. This report and all and any of its contents are neither a solicitation nor an offer to Buy/Sell any financial market.

The contents of this report are for general information and educational purposes only (contents shall also mean the website [www.rapidresultsmethod.com](http://www.rapidresultsmethod.com) or any website the content is hosted on, and any email correspondence or newsletters or postings or affiliate site as related to such website). Every effort has been made to accurately represent this product and its potential. There is no guarantee that you will earn any money using the techniques, ideas and software in these materials. Examples in these materials are not to be interpreted as a promise or guarantee of earnings. Earning potential is entirely dependent on the person using our product, ideas and techniques. We do not purport this to be a "get rich scheme."

Although every attempt has been made to assure accuracy, we do not give any express or implied warranty as to its accuracy. We do not accept any liability for error or omission. Examples are provided for illustrative purposes only and should not be construed as investment advice or strategy.

No representation is being made that any account or trader will or is likely to achieve profits or losses similar to those discussed in this report or anywhere on [www.rapidresultsmethod.com](http://www.rapidresultsmethod.com). Past performance is not indicative of future results.

By purchasing and/or using any content or product including material herein contained, subscribing to our mailing list or using the website or contents of the website or materials provided herewith, you will be deemed to have accepted these terms and conditions in full as appear also on our site, as do our full earnings disclaimer and privacy policy and CFTC disclaimer and rule 4.41 to be read herewith. So too, all the materials contained within this course, including this manual, whether they appear on our domain(s) or are in physical form, are protected by copyright. "Warning: The unauthorized reproduction or distribution of this copyrighted work is illegal. Criminal copyright infringement, including infringement without monetary gain, is investigated by the authorities and is punishable with imprisonment and a fine." We reserve all our rights in this regard.

Old Tree Publishing CC, in association with [www.rapidresultsmethod.com](http://www.rapidresultsmethod.com), the website, content, and its representatives including Russ Horn do not and cannot give investment advice or invite customers or readers to engage in investments through this report or any associated software or any subscription to any part of it.

The information provided in this content is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulation or which would subject us to any registration requirement within such jurisdiction or country.

Hypothetical performance results have many inherent limitations, some of which are mentioned below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and actual results subsequently achieved by any particular trading program and method or software. Old Tree publishing by users download and/or use of this report is indemnified fully by any such user in any and all and each respect possible.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk and no hypothetical trading record can completely account for the impact of financial risk in actual trading.

For example, the ability to withstand losses or to adhere to a particular trading program or system in spite of the trading losses are material points that can also adversely affect trading results. There are numerous other factors related to the market in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance results. All of which can adversely affect actual trading results.

We reserve the right to change these terms and conditions without notice. You can check for updates to this disclaimer at any time by visiting [www.rapidresultsmethod.com](http://www.rapidresultsmethod.com).

Further details on this are found under the Terms and conditions on our site. Please ensure you read and agree with all Terms and Conditions as set out on our site before using any of the materials. Your use and reliance on the materials is based on your acceptance of such Terms and Conditions and policies as appear on the site.

# *The Secret Method*

In this report, I will show you how to trade the Secret Method trading system. Since its invention, this method has been kept a secret for a very long time.

The main advantage of this system is its conservativeness in entering and managing trades, and of course, it can be traded in any timeframe.

## **System Components & Indicators**

### **Timeframe:**

All timeframes

### **Currency Pairs:**

Major pairs like the EUR/USD and the GBP/USD.

### **Indicators:**

1. Heiken Ashi
2. 14 period Simple Moving Average (SMA)
3. Moving Average of Oscillator (OsMA) - at default settings (12,26,9).
4. 10 period Momentum - level set at 100.
5. 5 period Relative Strength Index (RSI)

# Chart Setup

## 1. Heiken Ashi

1. Click on the **Line Chart** button to make the line chart appear. We will be using Heiken Ashi candles instead of regular candles.
2. Click on the **Navigator** button to open the Navigator window.
3. Click on **Custom Indicators** to expand the list of indicators.
4. Find **Heiken Ashi** on the list and double click on it for the settings dialogue box to pop up.
5. Click on the **OK** button for the Heiken Ashi candles to appear on the chart.

## 2. 14 period Simple Moving Average (SMA)

1. Click on the **Navigator** button to open the Navigator widow.
2. Click on **Indicators** to expand the list of indicators.
3. Find **Moving Averages** on the list and double click on it. The settings dialogue box will pop up, where you can set the parameters of the 14 SMA.
4. Set the **Period** at 14.
5. Leave the **Shift** at 0.
6. Click on the **MA method** drop down menu and select Simple.
7. Leave the **Apply to** section at the default value, Close.
8. Click **Style** to choose the color for your 14 SMA. On this chart, Lime is being used.
9. Leave the line type as it is by default.
10. This is for setting the 14 SMA line width.
11. Click on the **OK** button to apply the 14 SMA on your chart.

### 3. Moving Average of Oscillator (OsMA) - default settings (12,26,9).

1. Click on the **Navigator** button to open the Navigator widow.
2. Click on **Indicators** to expand the list of indicators.
3. Find **OsMA** on the list and double click on it. The settings dialogue box will pop up, where you can set the parameters of the OsMA.
4. Leave the **Fast EMA** at 12 (default).
5. Leave the **Slow EMA** at 26 (default).
6. Leave the **MACD SMA** at 9 (default).
7. Leave the **Apply to** at Close (default).
8. Click on the **Color** tab to set the color of the OsMA.
9. Click **Style** and select Blue for the color of your indicator.
10. This is for setting the OsMA histogram bar's width.
11. Click on **Levels** for the settings dialogue box to pop up, where to set the level.
12. Click on **Add** and a 0 level will appear on the left side of the box.
13. Here you can customize the level color, line type and width. Leave all of them as they are by default.
14. Click on the **OK** button to apply the OsMA on your chart.

#### 4. 10 period Momentum - level set at 100.

1. Click on the **Navigator** button to open the Navigator window.
2. Click on **Indicators** to expand the list of indicators.
3. Find **Momentum** on the list and double click on it.
4. Set the **Period** at 10.
5. Leave the **Apply to** section at the default value, Close.
6. Click **Style** and select Red for the color of the indicator.
7. Leave the line type as it is by default.
8. This is for setting the line width.
9. Click on **Levels** tab to set the indicator's level.
10. Click on the **Add** button and enter 100 for the level.
11. Here you can customize the level color, line type and width. Leave all of them as they are by default.
12. Click on the **OK** button to apply the Momentum on your chart.

## 5. 5 period Relative Strength Index (RSI) - level set at 50.

1. Click on the **Navigator** button to open the Navigator window.
2. Click on **Indicators** to expand the list of indicators. (2)
3. Find **Relative Strength Index (RSI)** on the list and double click on it.
4. Set the **Period** at 5. (4)
5. Leave the **Apply to** section at the default value, Close.
6. Click **Style** and select DodgerBlue for the color of the indicator.
7. Leave the line type as it is by default.
8. This is for setting the line width.
9. Click on the **Levels** tab.
10. Click on the **Add** button and enter 50 for the level.
11. Here you can customize the level color, line type and width. Leave all of them as they are by default.
12. Click on the **OK** button to apply the RSI on your chart.

# Long Entry Rules

1. A bullish Heiken Ashi candle (white) crosses above the 14 SMA.
2. The OsMA crosses above its Zero level.
3. The Momentum indicator crosses above the 100 level.
4. The RSI crosses above the 50 level.
5. As soon as all conditions mentioned above are met, we wait for the current candle to close then place a buy order.
6. Set the Stop Loss a few pips below the last swing low point.
7. Set the Take Profit at double the amount of the Stop loss.
8. We can close our long trade without waiting for the Take profit to be hit when OsMA crosses below the Zero level.

Let's have a look at a long trade example on the next page.

## Long Trade Example

On the image above, we have a EUR/USD M5 chart, where a long trade was taken. The vertical line (A) marks the exact signal candle.

Two candles before that signal candle, the price has moved above the 14 SMA forming white bullish Heiken Ashi candles. The OsMA was following the price closely and has been above the 0 level for the past two bars. The Momentum has just crossed above the 100 level, while the RSI has been above the 50 level for a while.

As soon as all the rules were met and the current candle closed above the 14 SMA, a long position was opened at 1.29479 (B).

Next, the Stop Loss was set just below the last swing low, at 1.29399, or exactly 8 pips under the entry (C).

The Take Profit of 16 pips was also set, at 1.29639, which is exactly double the Stop Loss (D).

As you can see, the Take Profit was hit 35 minutes later.

Now let's take a look at Short trade conditions.

# Short Entry Rules

1. A bearish Heiken Ashi candle (red) crosses below the 14 SMA.
2. The OsMA moves below the Zero level.
3. The Momentum indicator crosses below the 100 level.
4. The RSI crosses under the 50 level.
5. As soon as all conditions mentioned above are met, wait for the current candle to close and open a short trade.
6. Set the Stop Loss a few pips above the last swing high.
7. Set the Take Profit at double the amount of the Stop loss.
8. We can close our short trade without waiting for the Take profit to be hit when OsMA goes above the Zero level.

Let's take a look at a short trade example.

## Short Trade Example

Below, you can see an AUD/USD M30 chart, where a short trade was taken.

The vertical line (A) shows the signal candle.

The first sign to start looking for a short entry was the candle before the formation of the previous bearish red Heiken Ashi candle, followed by the close current candle below the 14 SMA. The OsMA has gone below the 0 level two candles ago. The Momentum indicator crossed below the 100 level on the previous candle. The RSI has just crossed under the 50 level.

After the close of the current signal candle, a sell order was placed at 1.04938 (B).

Immediately after that, a Stop Loss was set at 1.05216, which is 27.8 pips above the entry and a few pips above the closest swing high (C). The Take Profit of 55.6 pips was set at 1.04382 (D).

The price kept falling and the Take Profit was hit not long after.

Not many traders know this strategy and it has been kept secret because of its profitability. Test this system, try it out on your charts and see for yourself.

Thank you for the time you spent with me and I hope you will benefit from what you have learned today.

Best Regards,

*Russ Horn*
