

PERCEPTRADER Ai

Set-up & strategy guide

Ver 1.0 - updated 24/07/2023

VALERYTRADING

Introduction

Welcome to the step-by-step setup instructions for Perceptrader AI Expert Advisor. In this guide you'll find a few different sections:

1. In the first section you will find a **general description** of Perceptrader AI: on what trading logic this EA is built upon, supported currency pairs, recommended time frame, features, a back-testing video, a profit calculator, and the verified MyFxBook / MQL live signals
2. In the second section you will find the **set-up instructions**, where I will walk you through on how to select the correct broker to trade, choosing MetaTrader 4 or 5, installing the EA in your MetaTrader terminal and loading it on your trading charts, as well as VPS information
3. In the third section you will see how to download Perceptrader AI and **start your 14 days free trial**, using the website's user dashboard
4. In the fourth section you'll find a comprehensive list of the Perceptrader AI's **parameters** and options of use, recommended **strategy, risk management**, grid settings, and some bonus tips and tricks
5. In the fifth section you will find instructions on **how to buy** your permanent Perceptrader AI license and access the **Telegram private group**
6. In the sixth section you will find some video testimonials by happy Perceptrader AI users, so that you can hear from them amazing success stories using the EA
7. In the seventh section, you will find information regarding our affiliate program, and how you can earn up to 50% commissions by referring colleagues/friends/family to Perceptrader AI or any of my Expert Advisors

I will try to cover everything relevant to Perceptrader AI on this guide, but it is possible that you still have doubts or face some issues while installing, configuring or trading with it. Please, feel free to contact me anytime at valery@valerytrading.com and I will be more than happy to help you out.

Description

Perceptrader AI is a cutting-edge grid trading system that leverages the power of Artificial Intelligence, utilizing **Deep Learning algorithms** and **Artificial Neural Networks (ANN)** to analyse big amounts of market data at a high speed and detect **high-potential** trading opportunities to exploit.

It is built upon Waka Waka's **proven** trading strategy, and seamlessly integrates with ChatGPT and Google's Bard for **accurate forecasts**, empowering traders with intelligent decision-making capabilities.

- Supported currency pairs: AUDCAD, AUDNZD, NZDUSD, NZDCAD, GBPCHF, USDCAD
- Recommended time frame: M5
- Utilizes Perceptron Deep learning algorithms & neural networks
- Integrated with ChatGPT and Google's Bard AI for market forecasting and trade filtering
- Unique trades feature: gives unique trades every time each trader runs it. No trader gets the exact same trades
- Incorporates the latest AI technology, but the underlying EA has been in development for years before release

Description

- Should run on a VPS continuously
- Not sensitive to spread/slippages, for what it can be used with any broker
- With only 1:30 leverage I advise not to use higher than low risk settings on a less than \$6000 account. With 1:100 leverage it should be fine with up to significant risk setting on a \$1000 account
- Features
 - One Chart Setup: you only need one chart to trade all symbols
 - Multiple currency pairs support
 - Solid backtest and live performance
 - No need to adjust GMT
 - Easy to use

Verified Track record: MQL5 live signals

Since being published on August 2019, Perceptrader AI has achieved:

- + 48 profitable months in a row (as from July 2023)
- + +225% account growth
- + 2.47% monthly gain
- 21.96% maximum drawdown

You can verify yourself the track record on the different Perceptrader AI MQL live signals:

- [Perceptrader AI "Unique" mode long-term relatively low-risk setting](#)
- [Perceptrader AI "Standard" mode high-risk setting](#)
- [Perceptrader AI high-risk setting](#)

Verified Track record: MyFxBook

Or on my verified Perceptrader AI MyFxBook track records:

- [Perceptrader AI "Unique" mode long-term relatively low-risk setting](#)
- [Perceptrader AI "Standard" mode high-risk setting](#)
- [Perceptrader AI high-risk setting](#)

Back-testing

Before ever deciding to trade with an Expert Advisor, it is a good idea to back-test it.

Backtesting is a method of analyzing how well a trading strategy could perform by applying it to **historical data from the real world**. It helps you compare different strategies and choose the one that gives you the best results.

The idea behind backtesting is that strategies that worked well in the past are likely to perform well in similar market conditions in the present and future. By testing trading plans on previous datasets that closely match current market conditions, you can see **how they would have performed** before actually making any trades.

However, it's important to remember that backtesting doesn't guarantee success in the current market. **Past results are not a foolproof indicator of future performance.**

Backtesting is simply a part of doing your research before entering a trade. It helps you understand the potential volatility of an asset and take steps to manage your risk accordingly.

You should also keep in mind that real trades **involve fees that may not be considered in backtests**. It's crucial to account for these trading costs when conducting simulations, as they will affect the profit-loss margins on a live trading account.

That's why constantly back-test all of my Expert Advisors, with **real tick data** and 100% accuracy trading history.

Here you have links to **+20 years** backtests for Perceptrader AI:

[Perceptrader AI back-testing data](#)

Back-testing videos

Every once in a while I record videos of visual back-tests for my Expert Advisors.

These videos are for short periods of time (2 years usually), as testing for longer ones would make the videos too long.

Here's are 2 years back-test with both "Unique" and "Standard" trading set files for Perceptrader AI, starting in 17 July 2021 and finishing in 17 July 2023, with a \$10.000 initial deposit.

In both cases, the exact same trading set files you'll find in Perceptrader AI's download folder were used, and the back-tests were conducted in a MetaTrader 5 platform, IC Markets broker.

If you have any questions regarding these videos, please feel free to contact us at support@valerytrading.com and we will do our best to help you out.

"Unique" mode

"Standard" mode

Profit calculator

Remember, past performance is **not a guarantee of future results**.

However, if you want to get an estimation of your **potential profits** using Perceptrader AI, you can access the profit calculator within your user dashboard on my website.

To use the calculator, simply input your deposit size, choose from the available risk settings, and adjust the time frame using the time bar.

The calculator will then provide you with an **estimated total profit**, along with estimated monthly gains and estimated drawdowns, displayed on the right-hand side of the calculator.

This can give you a rough idea of the **potential outcomes** when using the Expert Advisor under different scenarios.

These estimations are based on mathematical calculations that take into account the **historical trading performance** of my live accounts since each Expert Advisor was made available on MyFxBook.

SET-UP

V\ALERYTRADING

Download Perceptrader AI

If you haven't downloaded Perceptrader AI yet, that will be your first step.

Once downloaded, extract the .ZIP files into your desktop or desired folder, and proceed with this guide.

Inside this .ZIP file, you'll find these files:

- PerceptraderAI .EX4 (MetaTrader 4)
- PerceptraderAI .EX5 (MetaTrader 5)
- Servers.txt
- Perceptrader AI set-up guide PDF
- Perceptrader AI trading sets

Recommended Forex brokers

Based on my own experience and my client's, these are my top 3 recommended brokers to trade with my EAs:

1. [IC Markets](#): IC Markets is one of the most renowned Forex CFD provider, offering trading solutions for active day traders and scalpers as well as traders that are new to the forex market. IC Markets is Australian-based, headquartered in Sydney.
 - Most popular retail Forex broker worldwide
 - Excellent trading conditions
 - 24/7 support available
 - EU, AU and offshore-based branches for different audiences

2. [Fibo Group](#): International Financial Holding FIBO Group (Financial Intermarket Brokerage Online Group) is one of the oldest players in marginal internet trading. The first company of the holding was founded in 1998. FIBO Group is among top-20 global Forex brokers.
 - Long-established European company
 - Best trading conditions on the market (in the offshore division)
 - Several branches for different audiences
 - Regulated by FSC
 - Annual audits since 1998 for compliance

Recommended Forex brokers

3. [Tickmill](#): Tick Mill is an online Forex Broker with a proven track record of strong financial results and stable growth. Tick Mill has put itself in an enviable position as a trusted market leader and innovator.

- Extremely secure broker
- Good trading conditions on most liquid pairs
- Not as good with cross pairs
- Negative balance protection
- Regulated by CySEC, FCA, FSA, FSCA

4. RannForex: small offshore broker, sometimes with the best trading conditions

5. XM: reputable broker with good trading conditions at night

6. Pepperstone: good option for big lot sizes

7. MT.COOK: small, but capable broker for professionals

8. ThinkMarkets

9. AxiTrader

10. Oanda (the best choice available for US citizens)

Feel free to choose any broker from this list of any other of your preference to trade with my Expert Advisors, but please, make sure it is one that offers you good trading conditions.

Popular Forex brokers within clients

We recently run an anonymous poll on our private client's Telegram groups, with the question **"What's your broker/s of preference for ValeryTrading EAs?"**

All the recommended brokers were placed as options.

These were the results after almost 200 votes, ordered by popularity:

1. IC Markets = 59%
2. Others = 24%
3. Pepperstone = 6%
4. Tickmill = 3%
5. FiboGroup = 2%
6. OANDA = 2%
7. XM = 2%
8. ThinkMarkets = 1%
9. RannForex = 0%
10. MT.COOK = 0%

As you can see, many clients trade with my recommended brokers, and many prefer others that fit their specific needs and wants.

If you have any doubts regarding your broker selection, feel free to contact us at support@valerytrading.com and we will help you out

Forex Brokers account sizes

Another question we get a lot is regarding how much clients should invest to trade with my Expert Advisors.

Here's an anonymous poll on our private client's Telegram groups, with the question "**Total trading account size (of all trading accounts combined)**"

These were the results after more than 200 votes, ordered by total account size:

1. 0-5k = 27%
2. 5-10k = 16%
3. 10-25k = 14%
4. 25-50k = 12%
5. 50-100k = 12%
6. 100-500k = 11%
7. 500k-1m = 3%
8. +1m = 5%

These numbers might help you to decide how much capital you should be investing to trade with my Expert Advisors.

If you have any doubts regarding your account/s size, feel free to contact us at support@valerytrading.com and we will help you out

MetaTrader 4 vs MetaTrader 5

After selecting a broker that aligns with your preferences, you will need to open a MetaTrader 4 (MT4) or MetaTrader 5 (MT5) account with them.

The choice between MT4 and MT5 doesn't significantly impact the trading algorithms used by the Expert Advisors. All of my EAs are **compatible with both platforms**.

While there may be some internal differences between the platforms, as the developer, I have ensured that you won't notice these variations.

Occasionally, there might be slight differences in quotes between MT4 and MT5, but these discrepancies are typically **small and random**.

MT4 is more widely supported by brokers, and as a result, it tends to be the preferred choice for most traders. However, MT5 offers a **superior tester**, which I recommend utilizing. I encourage you to test both platforms for yourself and determine which one suits your needs best.

Something worth mentioning, is that when you get a license for any of my Expert Advisors through my website, you will be able to use it **both for MetaTrader 4 and 5 accounts**, while if you get it through the MQL5 marketplace, you will be only able to use with with MetaTrader 4 or 5 accounts.

In case you want to make your own research and compare these platforms, here you have the links to their official websites:

[MetaTrader 4](#)

[MetaTrader 5](#)

VPS (Virtual private server)

A VPS (Virtual Private Server) is a **virtual machine** sold as a service by an Internet hosting service. I **strongly recommend you to install EAs on a VPS** to ensure they will be able to run continuously without interruptions, or needing to have your PC switched on all day long.

So, which VPS server should you choose?

Free Windows-VPS from Amazon or Google is suitable only for one terminal on which the EA is running

Free VPS servers are not suitable for the operation of several terminals or for the full-fledged work of EA, since they are severely limited in computing power and/or the amount of RAM

MQL5-VPS has two advantages:

1. Low latency between VPS and trade server
2. You do not need to spend activation to run EA on MQL5-VPS

But MQL5-VPS has significant drawbacks:

1. Very expensive. \$ 15 per month for 1 account, while on one Windows-VPS you can run 10-20 MT4 / MT5 terminals at the same time
2. Inconvenient. You cannot visually observe what is happening in the trading terminal. You can only read the logs. Very often this is not enough to quickly sort out problems that arise

Paid Windows-VPS is the **best solution**. For 95% of all possible tasks VPS server with 2-4 cores, 4-8 gb RAM and an SSD disk will be enough. On such a VPS, you can easily run 5-10 MT4/MT5 terminals

It is very important that your Windows VPS is close to your broker trading server. This minimizes the delay in trading

What is ValeryVPS

To make the user experience as effortless as possible, I offer a service of Forex trading Virtual Private Servers (VPS), designed for optimal results, customized with all of my Expert Advisors, and powered by the renowned company ForexVPS.net

[ValeryVPS](#) is perfect for you if you want to trade with my Expert Advisors already installed & configured, ready to go on a high-performance server, and located as near as possible to the leading Forex brokers

You can get ValeryVPS for **FREE for 6 months**, with the purchase of any of my Expert Advisors

Learn more about it in this introduction video:

How to activate your ValeryVPS

Once you purchase any of my Expert Advisors licenses, you can get free access to a ValeryVPS server for a period of 6 months. As explained before, this customized server is provided directly by ForexVPS.net

If after your 6 months period you want to extend your subscription, you can do it for **\$30 per month**, by contacting us at info@valerytrading.com

Here's a **step-by-step tutorial video** on how to activate your ValeryVPS:

VPS alternatives

In case you think ValeryVPS is not a good fit for you, or want to set up Perceptrader AI in a VPS for your trial period, you can choose any other VPS.

Here is a list of Windows VPS hosters that I can recommend:

- [Contabo](#)
 - 4 Core
 - 8GB RAM
 - 200GB
 - \$12/month
 - Ger, USA, MO
- [PowerVPS](#)
 - 2 Core
 - 5GB RAM
 - 40GB
 - \$12/month
 - Fra, Ger
- [Hyonix](#)
 - 2 Core
 - 4GB ram
 - 50GB
 - \$12/month
 - UK, USA VA+CA

Any of these three, or practically every paid windows VPS will be good enough for you to run Perceptrader AI. Just make sure you use a VPS.

How to set-up video

Once you've chosen a broker and opened an account, downloaded Perceptrader AI and arranged a VPS or your own computer, you can proceed to set up the Expert Advisor.

Here is a **step-by-step video** to help you with that:

How to install the EA

Start by installing Perceptrader AI to your MetaTrader 4 or 5 platform on your VPS/own computer and proceed to in the “Expert Advisors” folder of your terminal.

To do so:

- a. Click on “File” , in the top menu

- b. Click on “Open Data Folder”

- c. A folder will pop up, now click on “MQL5” > “Experts” > “Advisors”

Installing Perceptrader AI

d. Drag Perceptrader AI from your desktop or folder of choice to the “Advisors” folder

e. Head back to your MetaTrader terminal, and locate the Navigator to the left hand side of the screen. Once there right click on the “Advisors folder”

f. Click on “Refresh” and maximize the “Advisors” folder

If everything was done correctly, you should see Perceptrader AI now in the list, ready to be used.

How to allow algorithmic trading

The next step is to allow algorithmic trading and web requests on your MetaTrader terminal, two configurations which are a must if you want to trade with Perceptrader AI.

- a. On your MetaTrader platform, head to the menu on the header and click on “Tools”, and then on “Options”

- b. Head over to the “Expert Advisors” tab and click on it

- c. Check the “allow algorithmic trading” box

How to allow web requests

d. Check the “Allow WebRequest for listed URL:” box

e. Add the following URLs by clicking on the green “+” symbol and copy-pasting one by one :

https://ec.forexprostools.com
https://www.worldtimeserver.com
http://timesrv.online
http://valeryservice.com
http://valerytools.com

f. Click on the “OK” button and return to your MetaTrader terminal

IMPORTANT: All the URLs mentioned above are of **critical importance** for the correct functioning of all my Expert Advisors. The EAs use these URLs to manage licensing and economics news filtering. Failing to add them will prevent my Expert Advisors from working in your MetaTrader terminal, so make sure to do so.

How to set up a chart

Once you've successfully installed Perceptrader AI to your MetaTrader terminal, allowed for algorithmic trading and added the necessary URLs, you can set up the EA on your trading charts.

To do so, follow these steps:

1. Open a market chart, where you'll be loading Perceptrader AI to analyze the price movements of the currency pairs it is designed to trade
 - a. On your MetaTrader terminal, head up to the menu below the header, and click on the "Create a new chart" button

- b. Select which currency pair you want to open a chart for and click on it. The charts you use will depend on each Expert Advisor and its trading strategy. In this example, I will select "AUDCAD".

Setting up a trading chart

3. Select the timeframe for the chart by clicking in any of the available time frames in the top menu. As Perceptrader AI works for 5 minutes time frame, I will set it for “M5” (5 minutes)

4. Head over to the “Expert Advisors” menu in the Navigator, and drag Perceptrader AI into the chart.

How to configure your parameters

4. A window will pop up, with the Expert Advisor information under the “Common” tab and parameters configuration under the “Inputs tab”, that you can modify to fit your wants and needs.

Perceptrader AI has **+50 configurable parameters** that will directly affect how the EA trades in your accounts and the results you get. You can find detailed information about each one of them later in this guides. The set of **parameters that load by default are the ones I recommend** to anyone starting out with my Expert Advisors. These are the same ones that I utilize on my official MyFxBook track records, so it's a good idea to stick to them.

5. Once you're done with modifying your parameters, loading a given trading set-file, or decide to stick with default parameters, click on the “OK” button.

Automated trading

Whether you decide to go with the preloaded parameters or modify them, you will need to click on the 'OK' button and then everything will be ready for your EA to start trading automatically on your account, which looks something like this:

To verify that everything is set up correctly in case of MT 4, you can check if there is a smiley or a sad face next to the EA name on the top hand-right side of your chart. A smiley face means everything is ok, and a sad face means there is some configuration error.

In case you face any issues at this point, please contact us at support@valerytrading.com and we will be more than happy to help you!

How to subscribe to my Telegram channel

I strongly urge you to join my Telegram announcement channel.

Why?

Because there, you will have access to continuous updates and insights on my expert advisors, market trends, and algorithmic trading as a whole.

Staying informed with the latest and most relevant information will empower you to make informed decisions, allowing you to maximize your profits while effectively managing your risk.

Trust me, it can make a significant difference in your trading journey.

To follow the channel, simply click on the provided link and become a subscriber.

I recommend enabling notifications so that you receive immediate alerts whenever a new post is made.

[Join my public Telegram channel](#)

FREE TRIAL

V\ALERYTRADING

How to activate your trial license (video)

After registering in my user dashboard, you can start **14 days free trials** for Perceptrader AI, from the “Expert Advisors” tab in your [user dashboard](#).

You’ll get unlimited access to the EA for 14 days, and be able to trade with it in your demo or live account. You will not be required to provide any payment details or make a commitment of any type.

Mind that you will need a MetaTrader 4 or 5 account number to start your trial, so in case you do not have one, please head over to the “[brokers](#)” section of this guide.

Here is a **step-by-step tutorial video** on how to start your trial, in just a few minutes. You can follow the instructions and get started within a few minutes:

How to activate trial license

In case the step-by-step tutorial video is not enough for you, here you have a breakdown of all the steps you need to take in order to start your free trial:

1. Your first step is to access your user dashboard [sign-up page](#) and create an account.
2. After you've created your account, log into it.
3. Once inside, you will land in the user dashboard "Expert Advisors" section, which looks like this:

Trial license activation

- Next, head over to Perceptrader's AI box, choose within MetaTrader 4 or 5, and click on the **'Start trial'** yellow button.
- Enter your MetaTrader account number and click on the **'Start Trial'** green button.
- Your Expert Advisor box will 'unlock', displaying to you an image of the EA, as well as a **'TRIAL: 14 Days Left'** label. That means your trial license is now active and available for 14 days. Each day this label will be updated, and inform you how many days you have left in your trial.

Trial license activation

Once your trial license is active on your dashboard, wait for a few minutes, and reload your Perceptrader AI EA in a trading chart (close the chart, open a new one and drag the EA there)

The **“License error!”** message should now be transformed into a **“Live trading”** one. This means you are all set, and Perceptrader AI will start placing trades for you on your account.

If the license error message is not replaced by the live trading one, please make sure you have enabled the webserver URLs, which can be found [here](#).

In 95% of the cases, that is what is causing the issue, so make sure you verify that before anything. If you’ve checked it and it is still not working, contact me at **valery@valerytrading.com** and I will help you out!

Trial license activation

After starting your trial, you will receive an automated email confirmation from me:

Receiving this email means you are now officially allowed to trade with Perceptrader AI.

Please open this email to confirm that everything is working on your side. If you don't see a message, check your spam folder. It can sometimes end up there, depending on your spam filter settings

This will be the first email of many. For the duration of your free trial, I will be sending you valuable information on how to get the best out of my Expert Advisors, so please make sure you read them. They can make the difference between achieving success with the EAs or failing to do so.

Not only that, but I will be also sending you a few success stories of clients of mine using my EAs, so you can see what's possible and fuel your motivation to achieve what they did.

If at any point you want to stop receiving these emails, just let me know and I will stop sending them immediately to you.

PARAMETERS

Inputs

Once you load Perceptrader AI on your chart, pop-up box will appear showing settings of your EA. Make sure that all the settings and alerts are correct before clicking OK. A full list of settings is located in the next slides.

If your broker uses a suffix (e.g. EURUSD.a) you should update names in the Symbols separated by comma parameter (e.g. AUDNZD.a,AUDCAD.a,NZDCAD.a)

The screenshot shows the 'Perceptrader AI 1.62' settings window with the 'Inputs' tab selected. The window contains a table of variables and their values, along with 'Load', 'Save', 'OK', 'Cancel', and 'Reset' buttons.

Variable	Value
ab -----> MM & Risk settings <-----	Select the risk settings
Check for Instances of the EA	true
Allow Opening a new Initial Trade?	true
Allow Manual Trading Buttons	false
Lot-sizing Method	Low Risk Set (0.5% load)
1/2 Fixed Lot	0.01
1/2 Dynamic Lot (Balance/Equity based)	10000.0
1/2 Deposit Load %	0.25
Fixed Initial Deposit? (Tester only)	false
1/2 Tester Withdrawal (Tester only)	0.0
1/2 Withdrawal Amount (Tester only)	1000.0
Rounding Method	Round half up
1/2 Max Lot per Order	100.0
Auto Split?	true
1/2 Maximum Spread, in pips	5.0
1/2 Maximum Slippage for a non-ECN acc, in pips	5.0
01 Maximum Symbols at a time	2
01 Only One Symbol if Grid reaches this Level [0-disabled]	0
Disable Trades on the Same Side of a Currency	false
Allow Hedging?	false
Allow Trading on Holidays?	false
Allow to Buy/Sell	Buy and Sell
1/2 Minimum Free Margin % [0-disabled]	0.0

Perceptrader AI: MM & Risk settings

- Check for Instances of the EA - checks that only one instance of the EA is running at a time. If EA detects other instances with the same UID, trading will be disabled.
- Allow Opening a new Initial Trade? - on/off opening of new grids. It does not affect the already open grids.
- Allow Manual Trading Buttons - enable/disable manual trading buttons that allow you to manually open an initial trade: the EA will pick up the manually opened trade and manage it as usual. The buttons are affected by the following parameters: Symbols, Maximum Spread, and Maximum Symbols at a time.
- Lot-sizing Method - select the lot sizing method according to the risk you want to take: Fixed Lots will use fixed lot size from the "Fixed lot" parameter, Dynamic Lots will use 'Dynamic Lot' parameter, Deposit load will calculate lots based on deposit load%, and 4 predefined presets will calculate risk automatically for you.
- Fixed Lot - fixed trading lot for the initial trade.
- Dynamic Lot (Balance/Equity based) - balance/equity to be used per 0.01 lot.
- Deposit Load % - % of the deposit that will be totally used to open the initial trade.
- Fixed Initial Deposit? (Tester only) - lot size will be calculated based on the initial deposit; new profits will not be considered.
- Tester Withdrawal (Tester only) - the withdrawal will take place if the account equity exceeds the specified value. For MT5 only.
- Withdrawal Amount (Tester only) - amount to withdrawal. For MT5 only.

Perceptrader AI: MM & Risk settings

- Rounding Method - allows you to choose the method of rounding fractional lots to calculate trading lot sizes.
- Max Lot per Order - maximum size of a single order.
- Auto Split? - option allowing the EA to trade with any lot size/volume without limits. Most brokers have a limit of 100 lots per order, so if the option is enabled, the EA will automatically split a large trading volume (e.g. 10000 lots) into multiple smaller orders (not more than 100 lots per the child order). It is intended to be used in tester to allow testing the EA on all the available history.
- Maximum Spread, in pips - maximal allowed spread.
- Maximum Slippage for a non-ECN acc, in pips - max allowed slippage for a non-ECN account.
- Maximum Symbols at a time - maximal allowed number of symbols that can be opened at the same time.
- Only One Symbol if Grid reaches this Level [0-disabled] - this option allows you to temporarily reduce the "Maximum Symbols at a Time" to one if an open grid reaches the specified level.
- Disable Trades on the Same Side of a Currency - this option disables the opening of new initial trades on the same side of a currency. For example, it can help prevent having 2 shorts for CAD at the same time to protect accounts from a strong trend for the CAD currency.
- Allow Hedging? - allow opening multi-directional trades on the same symbol.
- Allow Trading on Holidays? - on/off Christmas/New Year trading filter.
- Allow to Buy/Sell - on/off Buy/Sell trades.
- Minimum Free Margin % [0-disabled] - if Free Margin% falls below the specified value, the EA will not place new pending orders and will cancel already placed ones.

Perceptrader AI: MM & Risk settings

- Max Open Lots (Filter) - the EA will not send new initial orders if the volume of all positions opened by the EA exceeds the specified value.
- Max Floating Drawdown % - if current floating drawdown exceeds the specified % the EA will close open positions.
- Max Floating Drawdown in Money [0-disabled] - if current floating drawdown exceeds the specified value in money the EA will close open positions.
- Max Daily Drawdown Limit % FTMO Rules - maximum daily drawdown limit, calculated according to the FTMO rules. Non-trading operations (like withdrawals) during the day are not taken into account.
- Max Daily Drawdown Limit in Money FTMO Rules [0-disabled] - maximum daily drawdown limit in MONEY, calculated according to the FTMO rules. Non-trading operations (like withdrawals) during the day are not taken into account.
- Max Daily Drawdown Reset Hour FTMO Rules (Broker time) - hour to reset the max. drawdown with the prop firm.
- Max Drawdown Action - allows you to specify actions to be taken after the max. drawdown is reached (in money or %):
 - 'Close trades & stop trading for 24h' - the EA will close all open trades/grids and will not open new ones for 24 hours.
 - 'Close trades & stop trading until the end of the day' - the EA will close all open trades/grids and will not open new ones until the end of the day.
 - 'Close trades & stop trading until restart' - the EA will close all open trades/grids and will not open new ones until the EA/MT restarts.

Perceptrader AI: MM & Risk settings

- Max Drawdown Action - allows you to specify actions to be taken after the max. drawdown is reached (in money or %):
 - Close trades & resume trading as normal' - the EA will close all open trades/grids and resume trading as normal.
 - 'Prohibit opening new trades' - new grids will be prohibited as long as the floating drawdown is above a specified value;
 - 'Prohibit opening new trades until restart' - new grids will be prohibited until the EA/MT restarts.
- Max Drawdown Calculation - allows you to specify how the maximum drawdown is calculated:
 - 'The account' - takes into account all positions opened on the account, including trades opened manually or by other EAs;
 - 'This strategy' - takes into account only positions opened by this EA.
- Handle Max Drawdown Events on Every Tick - enable/disable drawdown event handling on every tick (instead of once a minute which is used by default, it may consume more CPU resources).
- Check Margin for all Grid Levels - if true, the EA will check if there is enough free margin to open all grid levels at the same time. If not enough, the initial lot size will be reduced.
- Check Bars for Errors - if true, the EA will check the relevance of historical data and bar opening time. Turn it off if your broker uses non-standard bar opening time (for example hh:02, hh:17, hh:32, hh:47).

Perceptrader AI: Risk management

When trading with a grid you do not usually experience realized losses, but you get floating drawdowns from time to time. Significant ones are usually rare, but it all depends on risks you set

You can set very high risks and lose the whole deposit in one go even on a small market movement or you can use lower risks and survive even another 2007-2009 financial crisis without a scratch

How to best deal with that? I usually recommend doing the following:

Imagine the biggest floating drawdown you can handle with the EA. Multiply that by 2. After that select risks level with which you did not have the historical drawdown exceeding this multiplied value

Why should you multiply the drawdown? Any trading system will eventually surpass the historical drawdown. Grid trading has a larger risks variability over time, so it needs this x2 margin to account for many things that will happen in the future that we don't know yet

Below you can find the table with Perceptrader AI test results on high-quality tick data from different sources:

Historical data / Set	Risk settings	Backtest Period	Years	Initial balance, \$	Net Profit, \$	Statistics						
						Total trades	Profit Factor	Recovery Factor	Equity Max DD, %	Max lever. used	Min margin level, %	Annual return*, %

Perceptrader AI: Time settings

- Hour to Start Trading - hour to start trading (for initial orders only).
- Minutes to Start Trading - minutes to start trading (for initial orders only).
- Hour to Stop Trading - hour to stop trading (for initial orders only).
- Minutes to Stop Trading - minutes to stop trading (for initial orders only).
- Trade on Monday - enable/disable trading on Monday.
- Trade on Tuesday - enable/disable trading on Tuesday.
- Trade on Wednesday - enable/disable trading on Wednesday.
- Trade on Thursday - enable/disable trading on Thursday.
- Trade on Friday - enable/disable trading on Friday.
- Rollover Start Hour - rollover start hour.
- Rollover Start Minutes - rollover start minutes.
- Rollover End Hour - rollover end hour.
- Rollover End Minutes - rollover end minutes.
- Send Orders During Rollover - enable/disable sending orders (including grid trades) during rollover time.
- Remove TakeProfit During Rollover - removes TP for all orders at the specified rollover time. This option helps to avoid closing trades via TP during bad trading conditions since slippage can turn a profitable trade into a losing one.

Perceptrader AI: Strategy

- Symbols separated by comma (custom if empty) – trading symbols separated by comma (custom if empty).
- Symbol Suffix – here you can specify a symbol suffix if your broker uses one.
- Custom Symbol Multipliers separated by comma (e.g. 0.9,1.2,1) – here you can set multipliers to calculate trading lots for each pair, for example, 1.0,0.7,0.9. This means that the first pair (specified in the 'Symbols separated by comma' parameter) will be open normally, but the second and third will have smaller lots, multipliers 0.7x and 0.9x.
- Percentage Pips Mode – enable/disable percentage pips mode. 1 percentage pip = $0.0001 * \text{Current Price}$.
- Trading Setup – trading mode:
 - 'Standard trades' – normal trading based on a well-defined set of rules.
 - 'Unique trades' – trading will be unique for each EA instance, including the time and direction.
- Trading Frequency [1..10max] (Unique trades only) – frequency of trades in the 'Unique trades' mode.
- Daily ATR Period – period of the daily ATR indicator for volatility calculation.

Perceptrader AI: Forecast settings (live trading only)

- Use ChatGPT Forecast – enable/disable filtering of trades using ChatGPT forecasts.
- Use Bard Forecast – enable/disable filtering of trades using Google Bard.

Perceptrader ChatGPT & Bard Market Forecasts

Perceptrader AI has been integrated with both **ChatGPT** and **Google's Bard AI**, giving the user the possibility to receive weekly market forecasts from these language models and filter trades according to them.

Here's a video that explains how to configure this feature, and how it works:

Perceptrader ChatGPT & Bard Market Forecasts

Here's how the market forecasts functionality works:

1

Configure your **ChatGPT or Bard** forecast settings in your EA parameters

2

Choose a currency pair and ask **ChatGPT or Bard** to give you a market forecast for the week

3

Get a weekly market forecast for your selected currency pair

5

Perceptrader AI will trade regularly, not trade, trade only strong bullish movements, or trade strong bearish movements.

✓ Regular trading

⊘ No trading

↗ Only buy

↘ Only sell

4

Based on the forecast data, Perceptrader AI will filter trades

Perceptrader ChatGPT & Bard Market Forecasts

If you want to make use of the market forecasts functionality, the first step is to enable it from Perceptrader AI's parameters.

To do so, head over to the "Inputs" section of the Expert Advisor, when you load it into your chart or if the EA is already loaded there, and scroll down until you see a section called "--> **Forecast settings..**"

Once there you can enable ChatGPT or Bards forecast by switching the value from "false" to "true".

There is nothing else you need to do after that. If the values are set to "true", Perceptrader will automatically use the forecasts to filter trades, without any intervention from you.

The forecast is the same for both language models, the only difference being how they word it. This means that the filter will work exactly the same way if you choose ChatGPT or Bard.

You can access the market forecasts functionality by clicking on the "**Market forecast**" button in Perceptrader AI's user graphics interface, next to ChatGPT/Google Bard icons:

Perceptrader ChatGPT & Bard Market Forecasts

Once you click on the button, a window will open, where you'll be able to choose within two dropdown menus:

1. Here you can choose within ChatGPT or Google's Bard to formulate the market forecast for you
2. Here you can choose within the 6 currency pairs that Perceptrader AI supports

After selecting the language model and currency pair, click on the "Forecast" button, and you'll receive your market forecast.

This is a brief technical analysis of the pair's price action, chart patterns, and an educated guess of future market movements.

Based on this forecast, Perceptrader AI will **filter trades**, taking one of four paths:

1. Trade normally
2. Not to trade
3. Open only buy positions
4. Open only sell positions

It is **very important** to understand here that once you enable ChatGPT or Google Bard's forecasts in your EA parameters, all this process will be done automatically.

Even though you can manually get the market forecast, that is not actually needed for the filter to work. That means if you activate the forecast in your EA parameters, and never click on the "Get forecast" button, the filter will still work.

Perceptrader AI: Machine learning setup

- Enable Neural Network Filter – enable/disable filtering of trades using machine learning technology based on Perceptron.
- Min Probability of Profit % – minimal predicted probability that a trade will result in profit. If Perceptron predicts a lower value, the trading signal will be ignored, and the INITIAL trade will be skipped.

Perceptrader AI: Take profit settings

- TakeProfit for Initial Trade, in pips - take profit for the initial trade (if no grid trades opened).
- Weighted TakeProfit? - if true, then Grid TP is weighted by volume so TP in pips decreases in proportion to the open volume of the grid levels. This allows keeping the initial TP in money unchanged after adding new averaging trades.
- TakeProfit for Grid, pips (can also be 0/negat. for emergency) - take-profit for the grid (if at least one averaging trade is open). It allows any value including zero and negative.
- Break Even (TP) after this Level [0-disabled] - break even feature after the specified Grid level is reached.
- Hide TakeProfit? - on/off take-profit hiding.
- Do not adjust TP unless new grid level opened - if true, the EA will adjust TP of open positions only when a new grid level is opened. The user can manually set their own TP, which will stay current until the EA opens a new grid level.

Perceptrader AI: Stop loss settings

- StopLoss for Grid, in pips (500 pips if zero) - stop-loss for the initial/grid trades.
- Hide StopLoss? - on/off stop-loss hiding.
- Trailing SL Size, in pips [0-disabled] - trailing stop in pips based on the grid breakeven point (=weighted average entry price of all orders including SWAPs and commissions).
- Trailing SL Start, in pips - number of pips in profit at which the trailing SL is activated.
- Randomize Order/TP Levels - if enabled, the EA will randomly slightly change the TP/SL levels. This option allows you to have a unique TP/SL.
- Max Random Delay before sending Orders, sec [0-disabled] - maximum random delay in seconds before sending an order. Values over 15 seconds are not recommended.
- Allow sending SL along with an order (for a non-ECN acc.) - if true, then the EA will send SL along with orders. If false, then SL will be set after the order is sent and executed.

Perceptrader AI: Grid settings

- Trade Distance - min. step in pips between grid(averaging) trades.
- Pause Between Grid Trades, in min [0-disabled] - minimum pause between grid trades in minutes.
- Smart Distance? - auto- adjusts the trade distance depending on market volatility.
- Maximum Trades - max number of grid(averaging) trades.
- Custom Multipliers sep. by comma (e.g. 1,2,4,8,14,24,41,69) - custom multipliers for each GRID step separated by a comma, for example - 1,2,4,8,14,24,41,69.
- Grid Level to Start (1-initial trade) - allows you to skip a certain number of grid levels, trading will start from the specified level. To calculate entries correctly, the EA opens "marker" orders at skipped levels with a minimum lot size.
- Keep Original Profit Level & Lot Size - when skipping grid level, the EA will keep profit target and lot sizes from the original strategy. This can help boost performance.

Perceptrader AI: News filter settings

- News Filter Enabled - on/off News Filter.
- Disable Trading on Bank Holidays - enable/disable trading on bank holidays according to the real-time Economic Calendar (<https://www.investing.com>). This filter is currency-specific. For example, with it, EA won't take trades on USD pairs during bank holidays in the USA. It also works in Strategy Tester.
- Disable Built-in News Filter Settings - disables the built-in news filter settings, allowing you to fine-tune the news filter.
- Custom Events (separated by comma, disabled if empty) - custom rules allowing you to fine-tune the news filter.
 - Format: Key[-Currency pair],Key[-Currency pair],.....,Key[-Currency pair]
 - Key - the currency of the news event or keyword in the news header. You can use multiple currencies without a separator, for example, USDAUDGBP.
 - If you specify a keyword, the letter case does not matter. For example, FOMC.
[-Currency pair] - optional parameter specifying which currency pair the rule applies to. For example -EURUSD.
Example: USD,AUDGBP-GBPUSD-NZDUSD,CHFEUR-EURUSD,FOMC,Rate-AUDCAD
USD, - takes into account all news events for USD on all currency pairs
AUDGBP-GBPUSD-NZDUSD, - takes into account all news events for AUD and GBP on GBPUSD and NZDUSD currency pairs
CHFEUR-EURUSD, - takes into account all news events for CHF and EUR on the EURUSD currency pair
FOMC, - takes into account news events with the word (or part of the word) FOMC in the header on all currency pairs
Rate-AUDCAD - takes into account news events with the word (or part of the word) Rate in the header on AUDCAD currency pair
 - Each rule must be separated by a comma. if 'Disable Built-in News Filter Settings'=false, then the custom rules are in addition to the built-in ones.

Perceptrader AI: News filter settings

- Medium Impact News - enable/disable news events with medium impact (2 stars news).
- Low Impact News - enable/disable news events with low impact (1 star news).
- Speaks - if false, then the EA will not consider news events marked as Speeches/Speaks.
- Wait Minutes Before Event - suspend trading before the news.
- Wait Minutes After Event - suspend trading after the news.
- Show News List - displays a list of upcoming news events to the right of the info panel.
- News List Refresh Rate - news events list update frequency (selection from the drop-down list).

Perceptrader AI: Stock market crash filter settings

- Stock Market Crash Filter Enabled - enable/disable the stock market crash filter.
- Stock Market Symbol - symbol name of the S&P500 stock index of your broker. It is usually called something like US500 or SPX500 (press Ctrl+U to see all symbols).
- Filter Period - period of the stock market crash filter.
- Max Historical Volatility (HV), in % - max. annualized standard deviation of H1 returns (HV in %).
- Block Trading for the Entire Day - prohibits opening new trades throughout the day if HV hits the specified level just once at any moment during the day.

Perceptrader AI: Additional settings

- Trade Comment - comment for orders.
- UID (0...9) - unique EA instance number. Usually, no need to change it.
- Show Panel - on/off Info-panel.
- Show Stats - show a panel with statistics.
- Font Size (1...8) - reduce this value if you're having trouble with the info panel.

Perceptrader AI: Backtest settings

- Disable Automatic GMT Detection - set it to 'true' to disable automatic GMT detection. You can use the 'GMT Test/Manual' and 'DST Test/Manual' parameters to manually set the GMT offset in live trading.
- GMT Test/Manual - GMT offset in winter in Tester.
- DST Test/Manual - DST in Tester.

LICENSE

V\ALERYTRADING

How to buy a permanent license

Hopefully you have an amazing trial with Perceptrader AI and are ready to take the next step to becoming a better trader

By acquiring a permanent Perceptrader AI license, you'll receive:

- ★ 10 MetaTrader 4 and 5 account activations
- ★ Lifetime license
- ★ Free updates
- ★ 6 months of ValeryVPS
- ★ Access to private Telegram group
- ★ 1 on 1 support from developer (Valeriia)
- ★ Remote desktop configuration

The prices for my EAs are incremental and slots limited. That is because I want to keep the amount of users low to be able to provide the best possible support to all of my clients, as well as working on constantly improving the EAs and developing new ones.

By having prices which increase with the amount of clients that buy my EAs, I am able to keep the number of clients limited and controlled. I would rather have less clients and be able to ensure them an excellent user experience than having lots of them.

Hope you can understand.

[Buy license on the website now](#)

[Buy MT4 license on MQL5](#)

[Buy MT5 license on MQL5](#)

100%, 30 day money back guarantee

If you are not completely satisfied with Perceptrader AI, I offer a **hassle-free refund policy**. Your satisfaction is my utmost priority.

I genuinely care about the results that each of my clients achieves, to the extent that I have been called "obsessive" at times.

It's no secret that this industry is filled with bad players with malicious intentions who make false claims about their EAs, aiming to deceive unsuspecting individuals venturing into Forex trading. I've personally seen and heard about thousands of them, so I understand where the skepticism comes from.

I have dedicated significant time (+10 years) and effort to perfecting my EAs, and I am confident that they can help traders **reach their goals and potentially even fulfill their dreams**. The evidence lies in the results they produce.

To demonstrate my confidence, in the highly unlikely event that you do not fall in love with Perceptrader AI, I am prepared to **promptly refund every penny you paid**, without any questions or hesitations.

Not only that, but I am willing to extend this exceptional guarantee for a **generous period of 30 days**. Compared to the standard 7-day guarantee offered by the MQL market and the absence of guarantees on most other EA selling sites, this is an exceptional offer that showcases my commitment to your satisfaction.

It's simple: either you are satisfied with your purchase, or you get **100% of your money back**.

You have my word of honor,

Valeriia Mishchenko
Algorithmic trading developer

License activation video

Once you purchase your Perceptrader AI copy, you need to make the request for your permanent license activation, through your website user dashboard

You can access the user dashboard sign-up/log-in page by [clicking here](#)

Here is a **step-by-step tutorial video** on how to do that, in just a few minutes:

How to activate your licenses

In case the step-by-step tutorial video is not enough for you, here you have a breakdown of all the steps you need to take in order to activate your licenses:

1. Your first step is to access your user dashboard [sign-up page](#) and create an account or log into it if you already have one.

You **must use the same email address** that you used when buying the EA license, for the system to recognize your purchase.

Once inside the user dashboard, you will find the dashboard with a navigation menu to the left, and the '**Expert Advisors**' tab will be selected by default.

If you head over to the box of the EA you purchased, it should be unblocked, displaying a small image of the EA on a MetaTrader chart, as well as a '**OWNED**' green box message.

This means the system successfully recognized your purchase, and you can now proceed to activate your MetaTrader 4 or 5 licenses your EA

In case after your purchase you do not see your Expert Advisor there, please contact us at support@valerytrading.com and we will help you out.

How to activate your licenses

2. To activate your Expert Advisor license, simply choose within MetaTrader 4 or 5, head to the EA box, and click on the “**Activate License**” button. In this example, I will activate a Waka Waka license, but the procedure is exactly the same for any Expert Advisor.
3. Next, enter your MetaTrader 4 or 5 account number and click on the “**Submit**” green button.
4. Once you do that, your license number will be visible and you will have one less available license. This means your EA is now **allowed to start placing trades** on that MetaTrader 4 or 5 account.

How to activate your licenses

After activating your license, you will receive an automated email confirmation from me:

Receiving this email means you are now officially allowed to trade with Perceptrader AI.

Please open this email to confirm that everything is working on your side. If you don't see a message, check your spam folder. It can sometimes end up there, depending on your spam filter settings

If you do not receive this email or have any issues with license activation, please contact us at support@valerytrading.com and we will help you out.

How to activate your licenses

Once your license is active on your dashboard, wait for a few minutes, and reload your Perceptrader AI EA in a trading chart (close the chart, open a new one and drag the EA there)

The **“License error!”** message should now be transformed into a **“Live trading”** one. This means you are all set, and Perceptrader AI will start placing trades for you on your account.

If the license error message is not replaced by the live trading one, please make sure you have enabled the webserver URLs, which can be found [here](#).

In 95% of the cases, that is what is causing the issue, so make sure you verify that before anything. If you’ve checked it and it is still not working, contact me at **valery@valerytrading.com** and I will help you out!

Access to exclusive Telegram group

After purchasing your Perceptrader AI license, you will be able to join the **exclusive private Telegram group**.

Within this group, you will find a community of hundreds of experienced users who have been trading with my Expert Advisors for up to 3 years.

The groups are usually very active, with the members sharing their experiences and expertise daily, learning from each other and working as a team to achieve their trading goals.

Additionally, you'll be able to find members of our team dedicated to providing technical support to whoever may need it.

Furthermore, I am involved in the groups, dedicated to assisting everyone with their queries and providing timely updates and relevant news.

Your satisfaction and success are my top priorities.

To join the Perceptrader AI group, simply look for the **"Telegram"** button inside the Expert Advisor in your user dashboard, and click on it.

You'll be automatically redirected to the group, with an invite to join.

TESTIMONIALS

V\ALERYTRADING

Testimonials

Since their launch in June 2021, my Expert Advisors have garnered significant attention and have attracted over **3,000** clients.

Together, we have formed what I believe to be the most exceptional trading community worldwide.

Professional service from Valery Trading Forex Ea's

I am new to trading with Forex Ea's - have been trading manually for the last 11 years. What amazes me the most is that the owner/developer Valeria takes the time to write/reply personally to all the questions asked. This lady has vast experience in Trading and is one of the very few developer of Ea's whom you can trust. Martin is also always helpful. Very professional service.

Like a breath of fresh air in Forex Trading

Like a breath of fresh air in Forex Trading. Only forex business I've seen that gives a free trial to prove the products, support and easy to use setup instructions. Several different strategy's to suit different traders risk factors with good proven backup information on MQL5 and myfxbook. Only downside is I can't give more than five stars.

Everything about Valeria products is a...

Everything about Valeria products is a great. Quality of the EA's in terms of trades, Balance protection by SL, settings of the EA's are totally customisable with some predefined strategy, documentation about the EA's are well detailed, videos, backtesting of the EA's are for a several years. Highly recommended

WakaWaka and Golden Pickaxe...

I use both WakaWaka and Golden Pickaxe and both work well. It is important to keep low risk settings, as both programs are aggressive when moving in the opposite direction. Otherwise there will be large positions and too high risk. I can recommend both programs.

Highly Effective EAs for Consistent Growth and Compounded Returns

I've been using Valery Trading's EAs (Expert Advisors) for a while now, and I've been extremely satisfied with their consistent growth and compounded returns. Their team of experts is highly knowledgeable and has developed advanced EAs that have helped me automate and optimize my trading strategies. The EAs are reliable and user-friendly, making it easy to track and manage investments. Overall, I highly recommend Valery Trading's EAs to anyone seeking consistent growth, compounded returns, and reliable trading automation tools.

Super constant GoldenPickaxe

Super constant, smooth growing.

Tool could be left alone without manual intervention, even if hard forex times.

I recommend to everyone who are looking for smooth-stable-growth-for-long-run and for those who wish to have a partner (Valery's products like GoldenPickaxe) who can trust to keep your balance growth. Also Valery (Valeria Mishchenko) always response and help you out and advise any questions - so You could count on her.

Beyond expectations

Beyond expectations. The EA waka waka is a real profitable tool. Valery should change the name to THE TRUTH.

Waka Waka forex trading bot

The Waka Waka forex trading bot is a solid investment for those looking to automate their forex trading strategy. As with any product, you get what you pay for, and this bot delivers on its promises. I've made profits using this bot, and the support from the Valery Trading team has been exceptional. They are always quick to respond and offer helpful solutions to any issues that arise. Overall, I highly recommend the Waka Waka forex trading bot to anyone looking to increase their profits in the forex market.

Perfect Start into Forex

I am part of this community for 2 months now and I am impressed. You can learn a lot if you are new in the chat group and Valery and her team are very responsive for answering questions and giving feedback. As well, they give advice on how to behave or set risk in difficult or changing market conditions. GREAT SUPPORT!!! Not to say, that her grid EA's work fine, you just have to know what is going on and manage your risk accordingly. Greed will destroy any account everywhere I think.

Very Professional Developer

The site and accessibility was one of the best I have seen. The instructions and information available about the EA are top level. No information has been hidden. I would recommend this EA.

Miraculous Valery

Hello, I want to thank you for your unparalleled service. Valery is very pleasant and promptly deals with any help. I am very satisfied with her approach. His EA's are second to none. We should address her "The Miraculous Valery"

Sincerely, JH.

Valleria EA has changed my life forever

I've used many different types of EA previously but none is as consistent and intelligent as Golden Pickaxe EA by Valleria Trading..... i'm really impressed on the winning percentage albeit i understand that with the 5 setting options provided for us to choose our trading risks, i preferred Risk Vol set file and it suits my risk appetite very well. The after service support from the team is great!

Brilliant EAS and Brilliant customer service!

I have been a long time customer of Valeria, her eas are very good (I would say the best on the market) she stands by them with proven track records. Valeria will go above and beyond to help you out if you need it. I had some experience also with Martin who I think works with Valeria he was very helpful also and a pleasure to deal with. 5 stars from me. Thanks for being awesome guys :)

Best Source for Profitable Forex EA's

Simply the best source for smart, profitable expert advisors (EA's) for MetaTrader forex trading. As a developer, Val is 100% mindful and caring of her clients' support needs. She could hire others to do the job, but she wants to provide the individual attention herself. Her EA's have the latest in tech advances as time goes by and analytics grow more sophisticated. My personal favorite EA is WakaWaka: very profitable and customizable. I'm now learning the Golden Pickaxe EA which shows great promise with numerous hi-tech analytical functions for profitably trading the volatile gold market.

Lifechangeing EA's - EXCELLENT!

I have been using Valery's EA for a long time now, I and have to say hands down it's the best decision I have ever made. Especially Waka Waka is definitely my fav of her EA, delivery profits every day with zero to none drawdown. Valery as a person and her community is excellent, every fast response time - always helpful

I have tried many EAs for Forex...

I have tried many EAs for Forex trading, most of them failed until I found Valery's EAs. They are one of the best in the market. The support you get from Valery and the team is extremely good. All of her EAs have live myfxbook verified accounts, detailed back test results and optimised set files. Valery goes out of her way to support her customers and provides free lifetime updates.

Long term profits...

The community that Valery's EA have are by far the best.. the channels are filled with very knowledgeable users that make the experience much better when dealing with the EAs. Not just limited to any single EA. The community the EAs have really brings out the best in these EAs and help making these EAs profitable long term.

AFFILIATES

V\ALERYTRADING

Affiliate program

In addition to earning profits through trading with Perceptrader AI, you also have the opportunity to generate income by participating in my [affiliate program](#).

Since the launch of my website, you can now passively earn by sharing information about my Expert Advisors with others.

The affiliate program offers a base commission rate of 20%, with the potential to **earn up to 50% in commissions** from the sales you refer. Once accepted as a program partner, you will receive a unique referral link.

Simply share this link online, and for each person who visits the website and purchases an EA, you can earn commissions of up to 50% of the sale value. The referral link includes cookies that remain active for 90 days on the browsers of your referred individuals. This means that if they request a trial and make a purchase within 90 days, you will still receive commissions.

If you have any questions or concerns regarding our affiliate program, please don't hesitate to reach out to **us at info@valerytrading.com**. We are here to assist you!

The screenshot displays the affiliate dashboard for Valeria Mishchenko, who is marked as 'Active'. The left sidebar contains navigation links: Dashboard (highlighted), Commission, Payment, Marketing Tools, Settings, Guide, and Log out. The main content area shows the 'Dashboard' tab selected, displaying a commission of \$13494 Paid. Below this, the 'Affiliate Link' section provides a default link: https://www.valerytrading.com?sca_ref=2464087.vnODU, with buttons to 'Get product link' and 'Get link with source'. The 'Your performance' section shows a date range of Jul 19, 2022 – Aug 17, 2022 and a source filter set to 'All Source'.

Affiliate program application

To join the affiliate program, you are required to [submit an application](#), which will be thoroughly reviewed before acceptance. I am specifically seeking qualified partners who align with my values.

Given the less-than-ideal reputation of the Forex EA industry, I am committed to avoiding aggressive promotion by scammers who may falsely portray my expert advisors as a "holy grail" or a "get-rich-quick" solution. Such misleading claims misrepresent the realities of trading.

Rest assured that I prioritize authenticity and transparency in promoting my expert advisors, focusing on their genuine capabilities and potential benefits for traders.

The screenshot shows a trading platform interface with a list of orders and a summary of account statistics. The orders list includes columns for Order, Time, Type, Size, and Symbol. The account summary shows Profit/Loss: \$54.19, Credit: \$400, Deposit: 250.00, and Withdraw: \$0.00.

Order	Time	Type	Size	Symbol
1718468	2022.08.24 12:40:00	buy	0.01	EURUSD
1718469	2022.08.24 12:40:00	sell	0.01	EURUSD
