

# Time settings

The robot should start at 3:00 UTC +3, change the start time according to your time zone! Don't forget that the world is switching to winter/summer time, take this into account when choosing the time to start the robot.

**Important!** The robot must be launched ONLY BY TIMER, if you want to launch the robot right now - set the timer for the nearest future but for the nearest start of the next 15 minutes, that is, if it is now 10:36, the next launch can only be 10:45.
