

ATTENTION!

Before installing the adviser, make sure that you are not authorized in MQL5 through the MetaTrader terminal, if you are, be sure to log out of your MQL5 account.

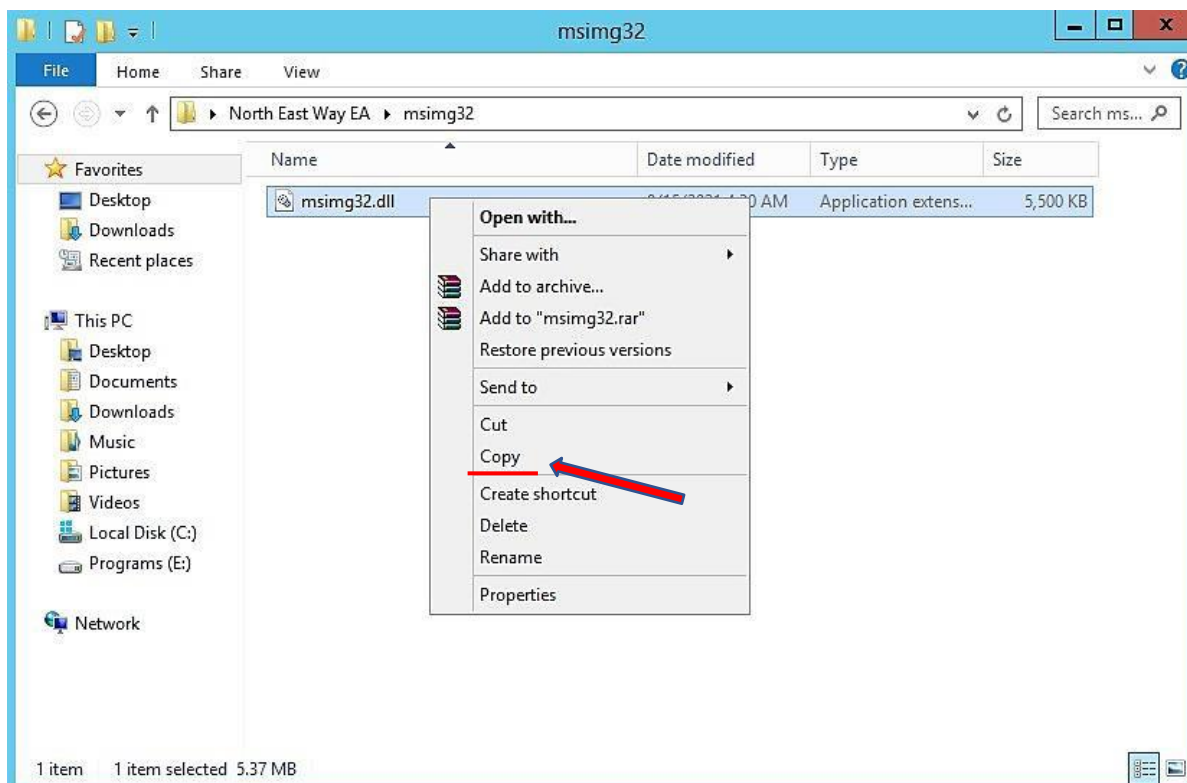

Installing an Expert Advisor

1. Close the MetaTrader 4 terminal
2. Right-click on the MetaTrader 4 terminal shortcut and select «***Open file location***»

3. Open the bundle you downloaded from the link

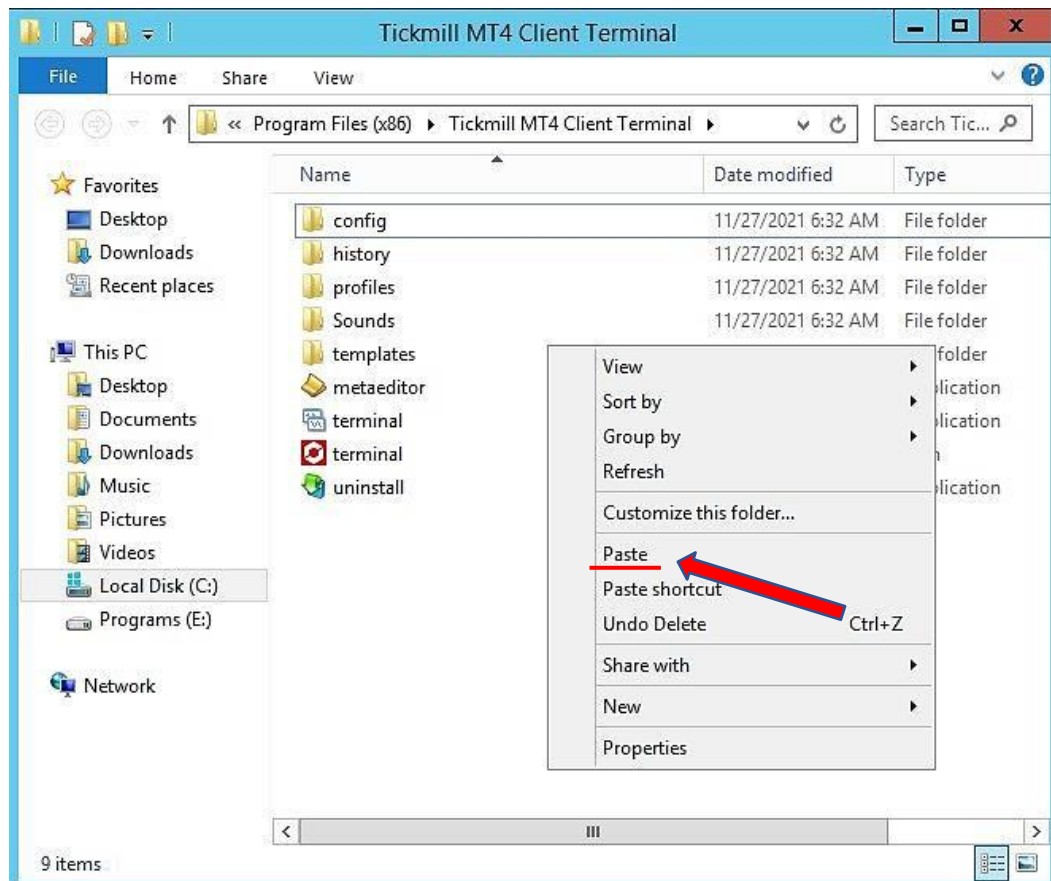

4. Find the msimg32.dll file there, select it and click «**Copy**»

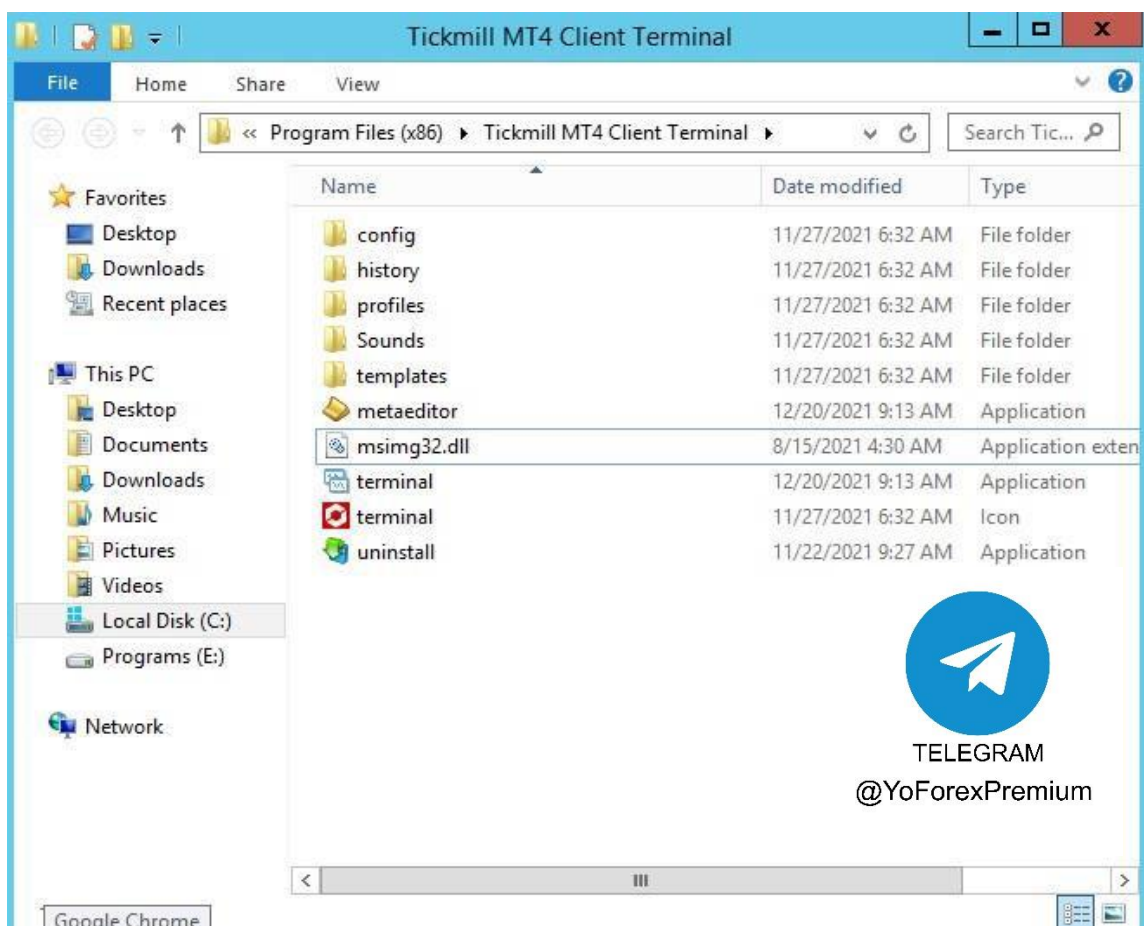

Attention! Sometimes the antivirus detects the msimg32.dll file and blocks it. However, this is not the case, this file is necessary for the reliable and stable operation of the Expert Advisor. Therefore, sometimes you have to add the msimg32.dll file to the antivirus exclusions!

5. Go back to the open terminal root directory and press «**Paste**»

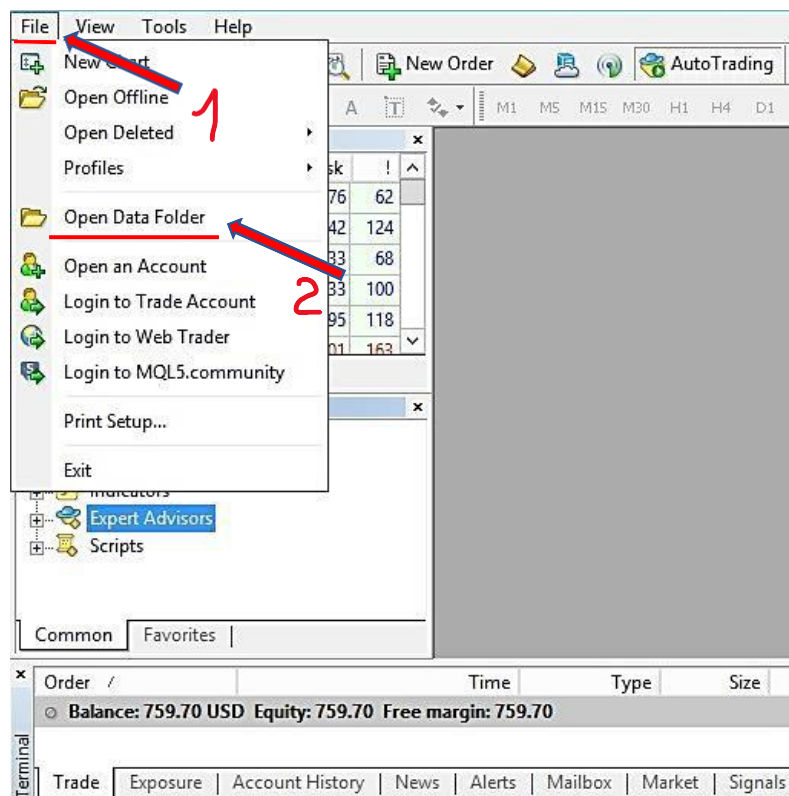

6. The msimg32.dll file should appear in the root directory

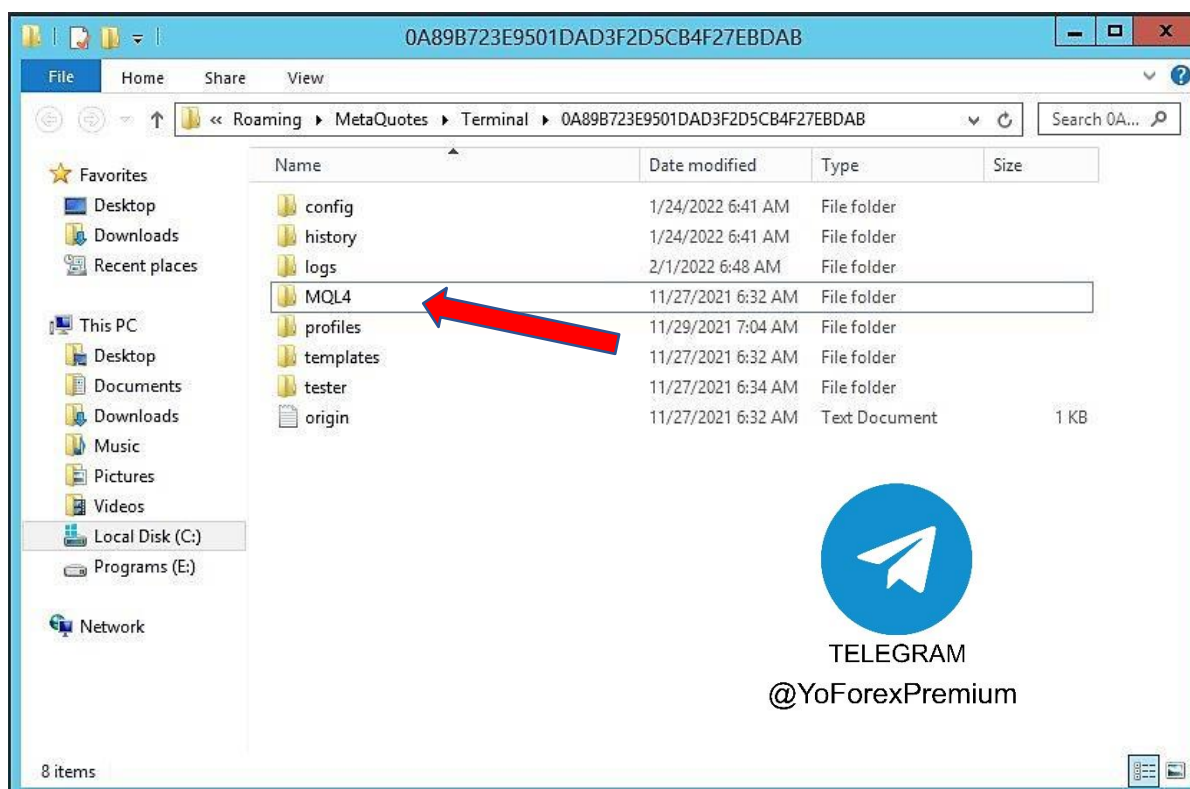

7. Launch the MetaTrader 4 terminal and connect to your broker

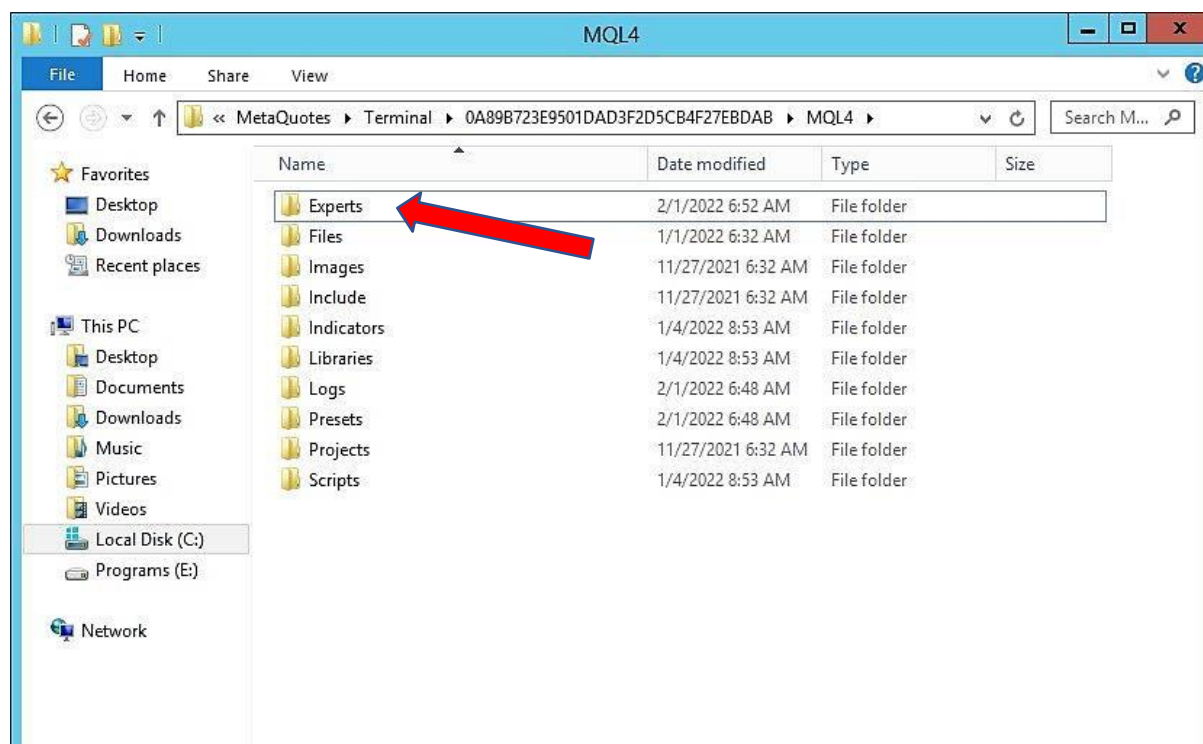

8. Click **File – Open Data Folder**

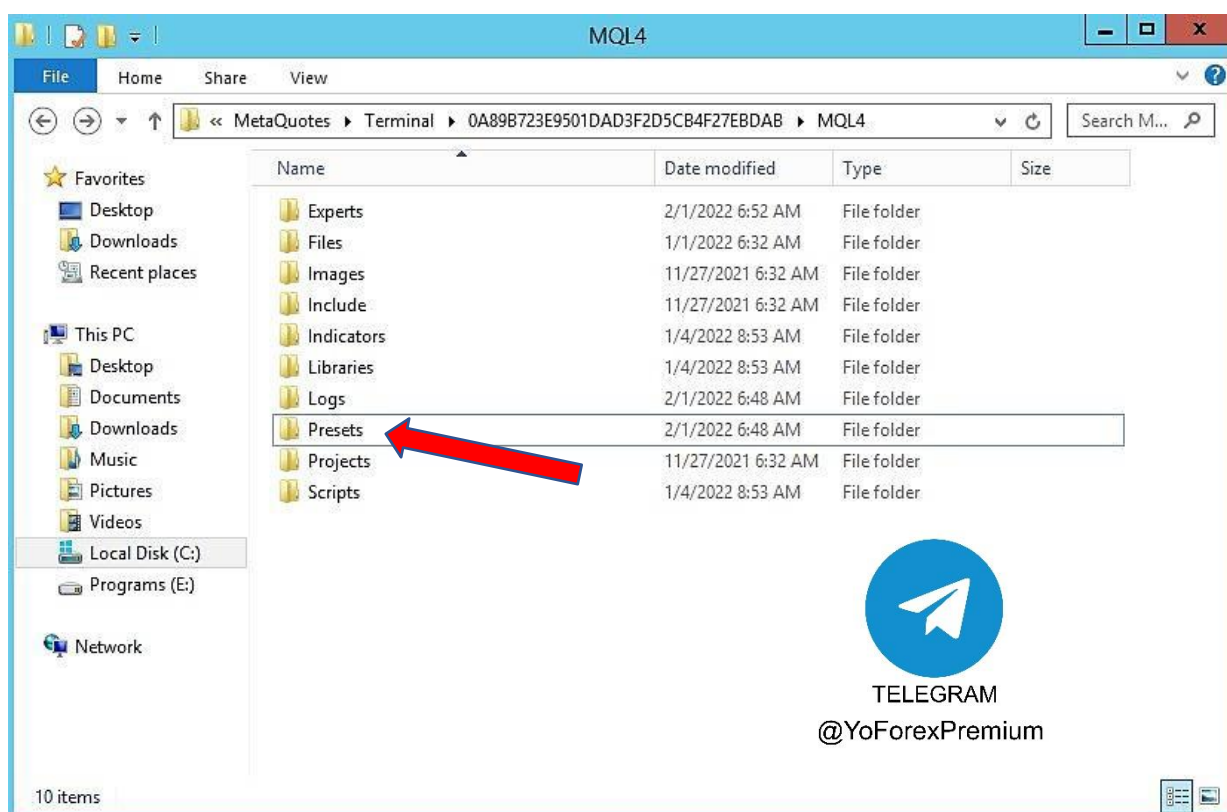

9. In the directory that opens, open the MQL4 folder

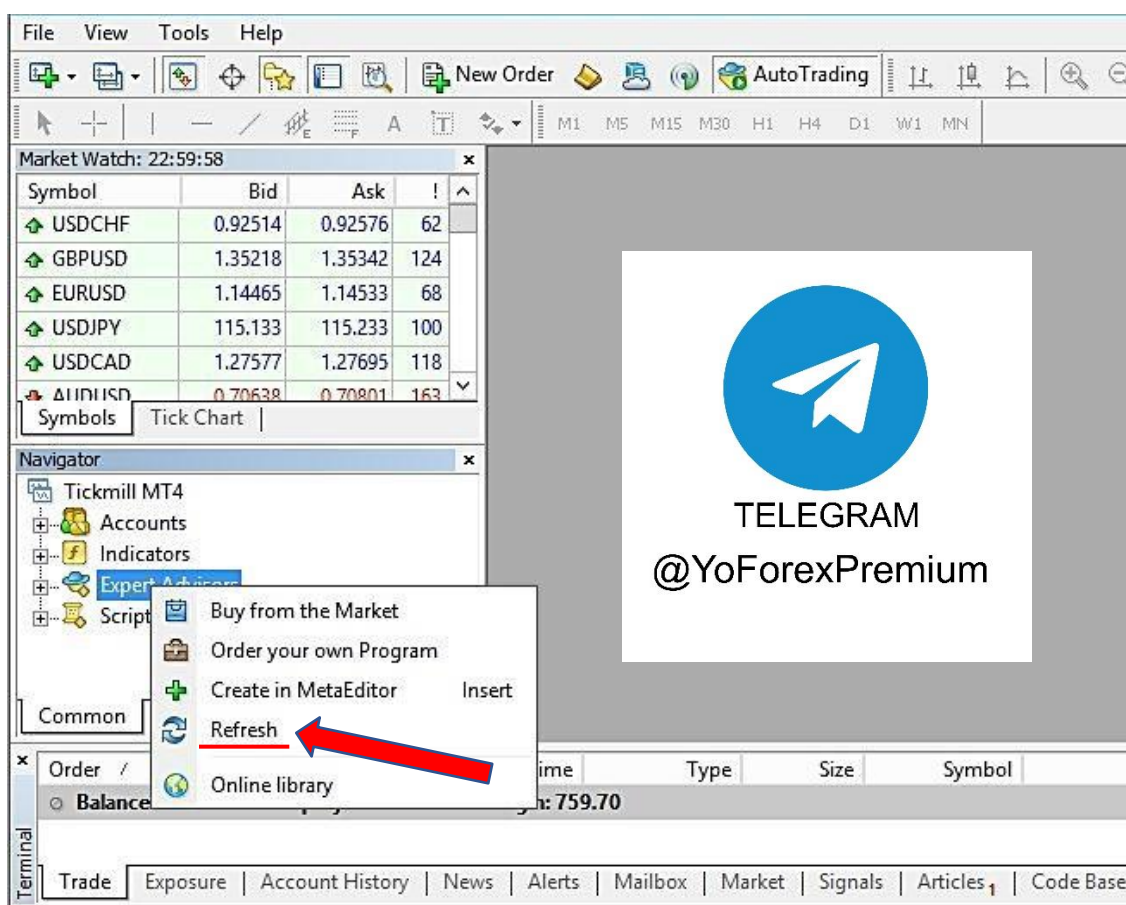

10. Copy the Expert Advisor (.ex4 format file) to the folder «*Experts*»

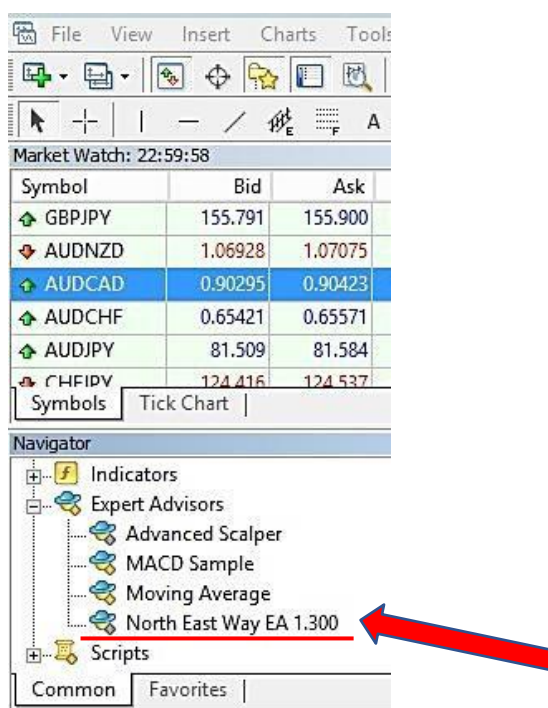

11. If there are Sets for your EA, then copy them to the folder «**Presets**»

12. Next, open the terminal and on the «*Expert Advisors*» tab, right-click and select «*Refresh*»

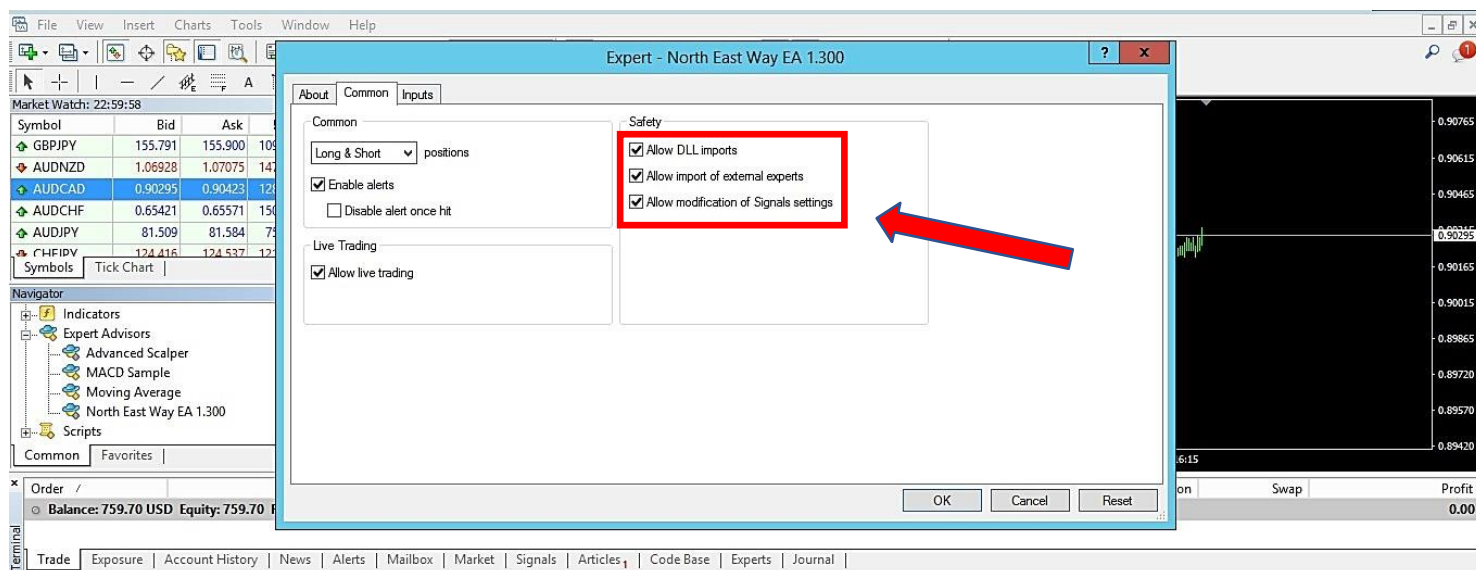

13. Now, by opening the «*Expert Advisors*» tab, you can see that the advisor has appeared in the list

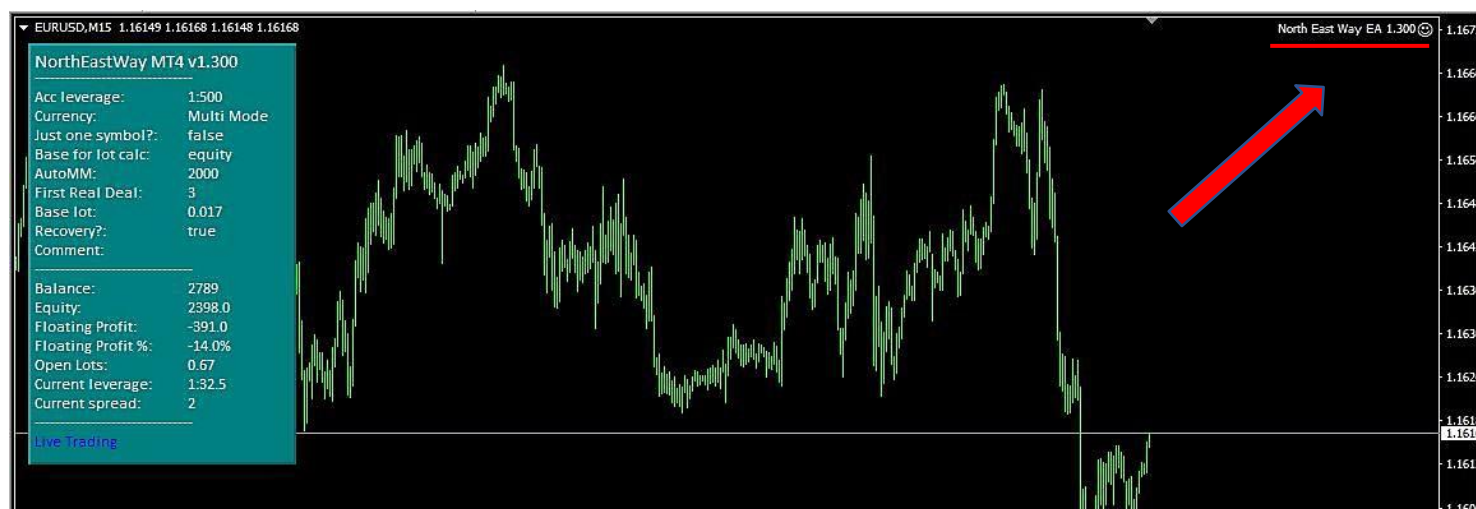

14. Next, drag the Expert Advisor to the desired chart

15. Please note that when setting up the adviser, all the checkboxes must be checked

16. Next, if necessary, load the Set through the adviser menu and click «OK»

17. Smiley should smile

18. The EA is working. Enjoy!
