

TestFxEA Manual

Trading pairs and timeframes:

AUDJPY M15

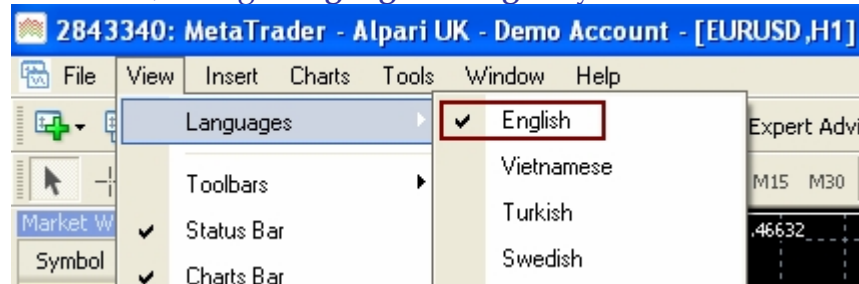

Recommended deposit size for EA:

5000USD if minimal allowed lot size = 0.1

500USD if minimal allowed lot size = 0.01

1) SETUP AND ACTIVATION

First of all, change **language settings** at your MetaTrade4:

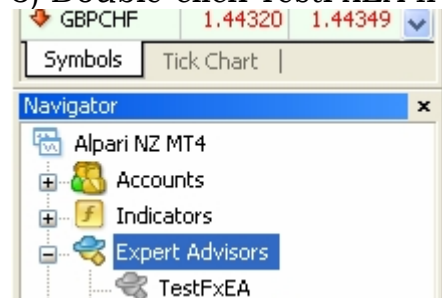

Close MetaTrader4 after this.

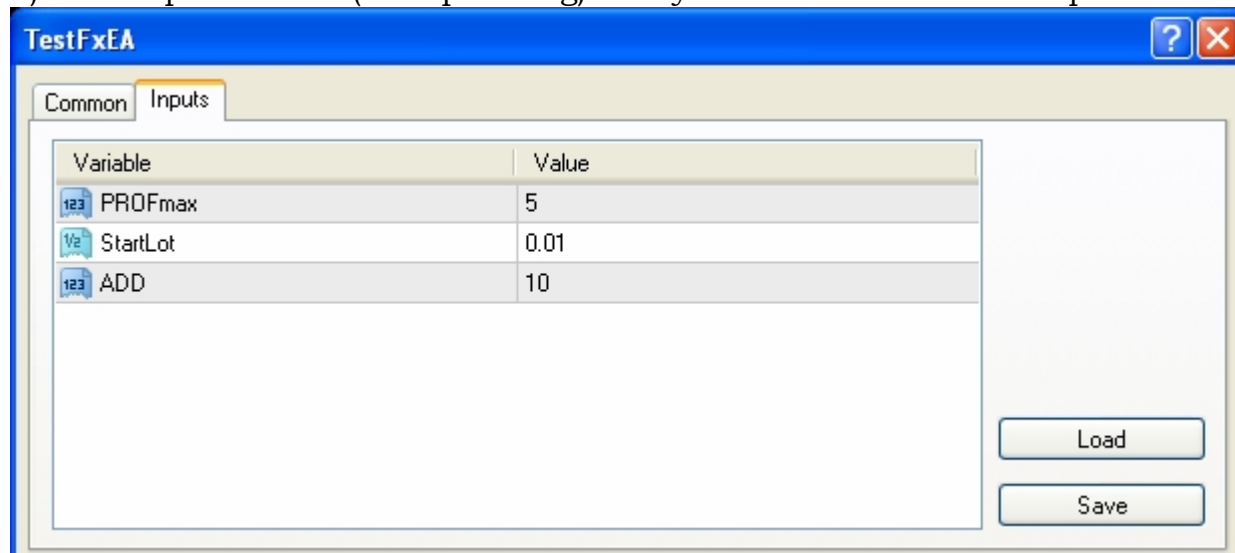

- 1) Place TestFxEA.dll to your [MetaTrader4\experts\libraries](#)
Place TestFxEA.ex4 to your [MetaTrader4\experts](#)
Place Volatility2.ex4 to your [MetaTrader4\experts\indicators](#)
- 2) Launch your MetaTrader4 terminal. From menu on the top go to **Tools > Options**.
Select following checkboxes and save settings by pressing OK:

- 3) Double-click TestFxEA from 'Navigator' menu:

4) Set EA parameters (at 'Inputs' tag) that you want to be used and press OK button.

5) Make sure button  is switched on. That's all, EA is running.

2) PARAMETERS

PROFmax – max take profit value (in sum) for all opened orders.

StartLot – initial lot size used by EA in trading process.

ADD – step in pips before new order should get opened.

3) CONTACTS

office@fx-emit.com

eminnovations.team@gmail.com

Currently TestFxEA would work at any account #. But once we detect that EA is getting distributed through the Internet or would notice that connections to EA server exceeding numbers of sold copies – access would be restrict to use EA only on 1 account#.

Recommended brokers: FxOpen (ECN account), Alpari (NDD account), FinFx (ECN account), ThinkForex, AxiTrader

Remember, be very careful around following calendar news:

RBA Rate Statement (AU)

FOMC Meeting Minutes (USA)

Non-Farm Employment Change, Unemployment Rate (USA)

FOMC Statement, Federal Funds Rate (USA)

We strongly recommend to stop trading of EA beforehand (2-3 hours before the release).

Mentioned news usually has very high and unpredicted impact on AUDJPY.
