ForexVentureBot Requirements

ForexVentureBot requires meta trader 4 to run. Most Brokers provide MT4 on their websites.

We suggest that you use a Virtual Private Server (VPS) If you don't have a very good computer or internet connection.

ForexVentureBot must be left on 24/7 to run properly.

Anti-Virus Notification

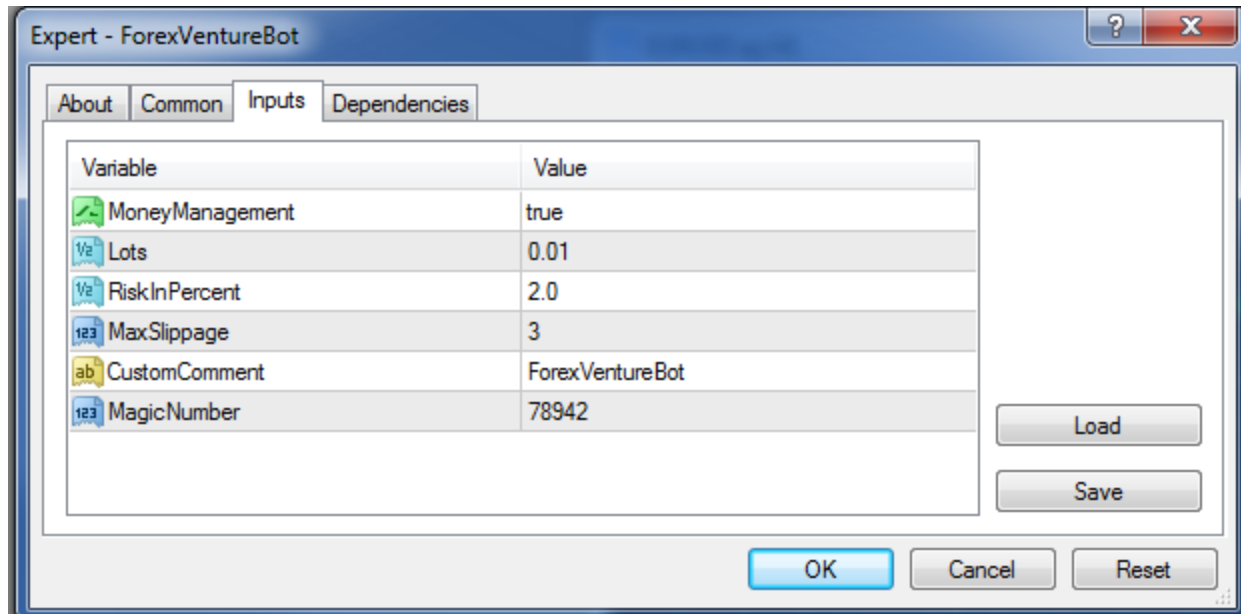

From time to time certain anti-virus software may flag ForexVentureBot as a virus.

It is NOT one. This is because there is a high level of encryption used in the software to protect it from abuse, while also connecting to our servers for verification.

So please mark this software as exempt if necessary by your firewall and or antivirus.

If for any reason you do not believe us, you are welcome to double check with your antivirus company.

ForexVentureBot Settings

MoneyManagement – Setting this to true will enable the money management feature of ForexVentureBot.

Setting this to false, will disable money management and will enable the use of fixed lots.

Lots – If MoneyManagement is set to false, ForexVentureBot will use the number of lots entered for this parameter for every trade.

For instance if MoneyManagement is false, and Lots is set to 0.5 lots, every trade will open with 0.5 lots.

RiskInPercent – If MoneyManagement is set to true, ForexVentureBot will automatically decide the number of lots based on the value set as the percentage.

For instance if MoneyManagement is true, and RiskInPercent is set to 5, every trade will automatically open with a max risk of 5%.

MaxSlippage - If the slippage of the broker exceeds this amount, ForexVentureBot will not allow the trade to commence and the trade will not be opened.

Comment – This allows for you to change the comment that is displayed under the comment section in your account history and your live trades.

This has no effect on the trading of ForexVentureBot and is only for your own reference.

MagicNumber - Allows ForexVentureBot to identify its own trades.

This also allows for ForexVentureBot to coexist with other EAs on the same account.

Activation

ForexVentureBot must be activated before it can be used!

Steps for activation:

1. Visit <http://ForexVentureBot.com/members.php/>
2. Enter your login information. Your password will be the receipt number you received with purchase

☐ **Keep me signed in**

[Forgotten your password?](#)

Login

3. Once you are logged in, click the [Please Click This Link To Activate Your ForexVentureBot Copy](#) Link
4. Enter the information required into the text field.

ForexVentureBot Account Activator

Purchase Receipt:

E-mail Address:

Meta Trader Account Number:

Activate License

5. Click "Activate License"

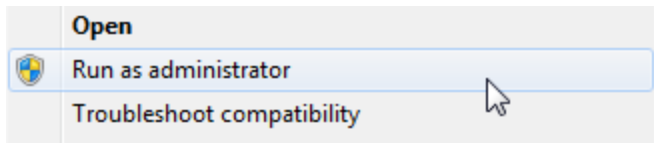

You are now ready to attach ForexVentureBot.

Installation

1. **Make sure MT4 is not running. ForexVentureBot will not be installed properly if MT4 is running during the install.**

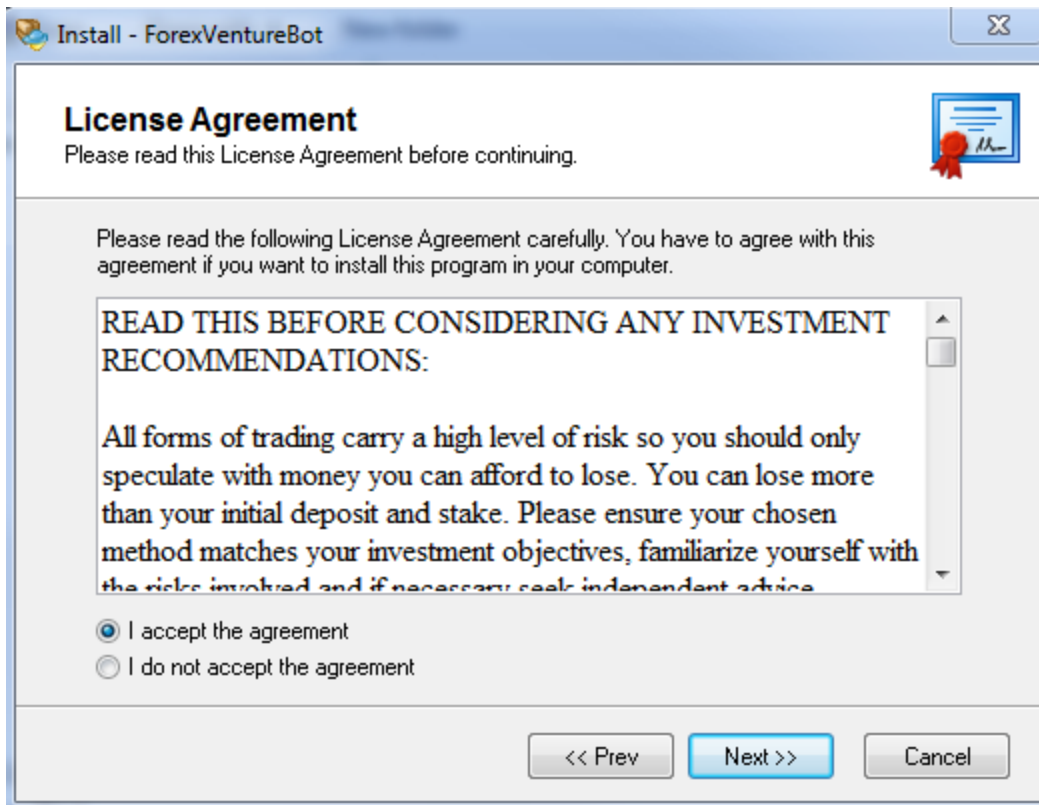

2. Right Click on ForexVentureBot and select "Run as Administrator"

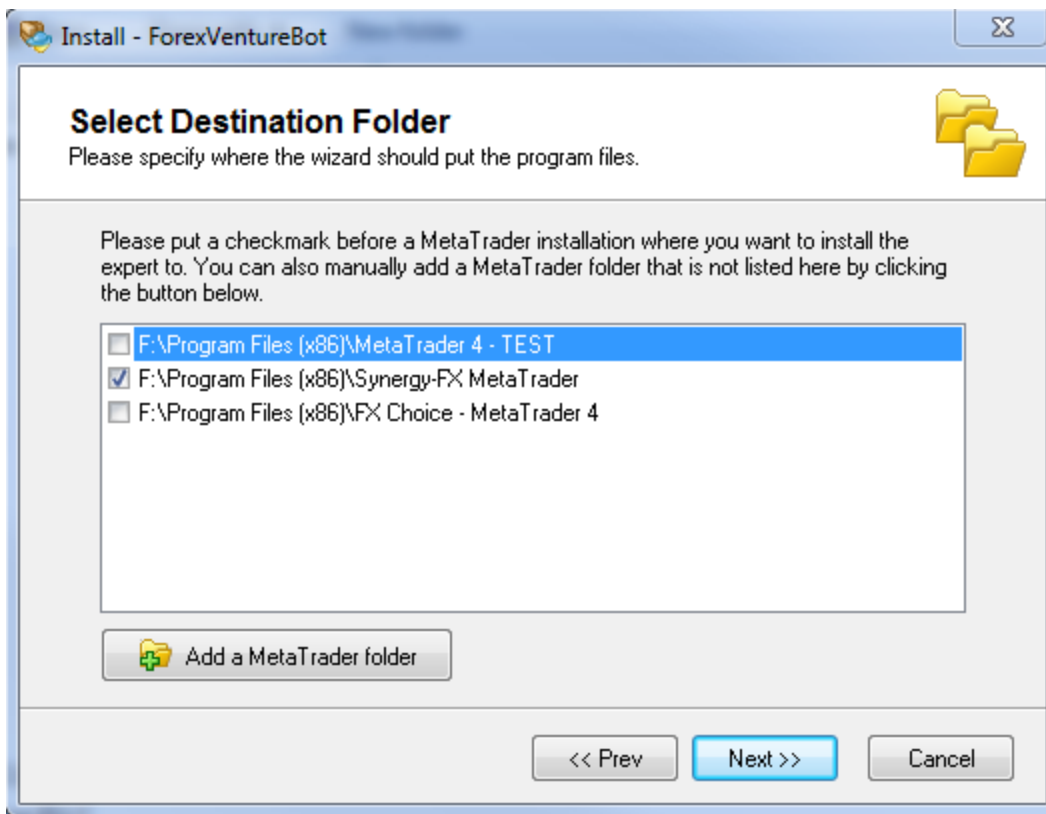

This will make sure the files are installed properly.

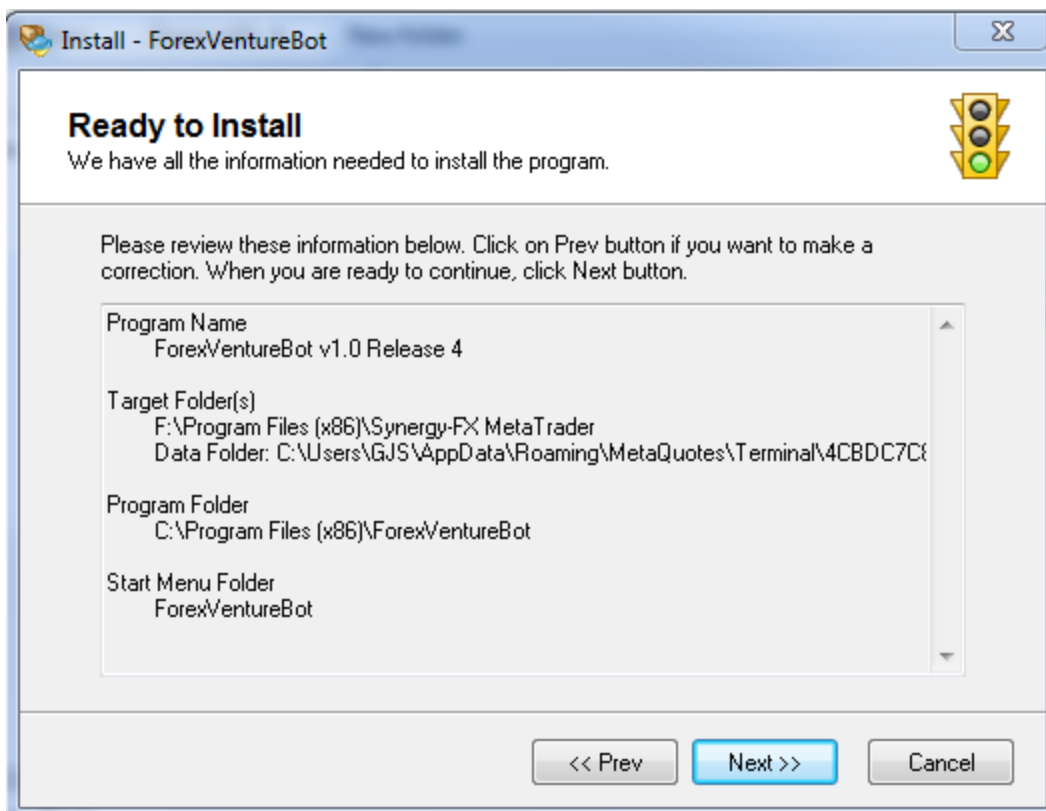

3. Click "Next>>"
4. Select "I accept the agreement" and click "Next>>"

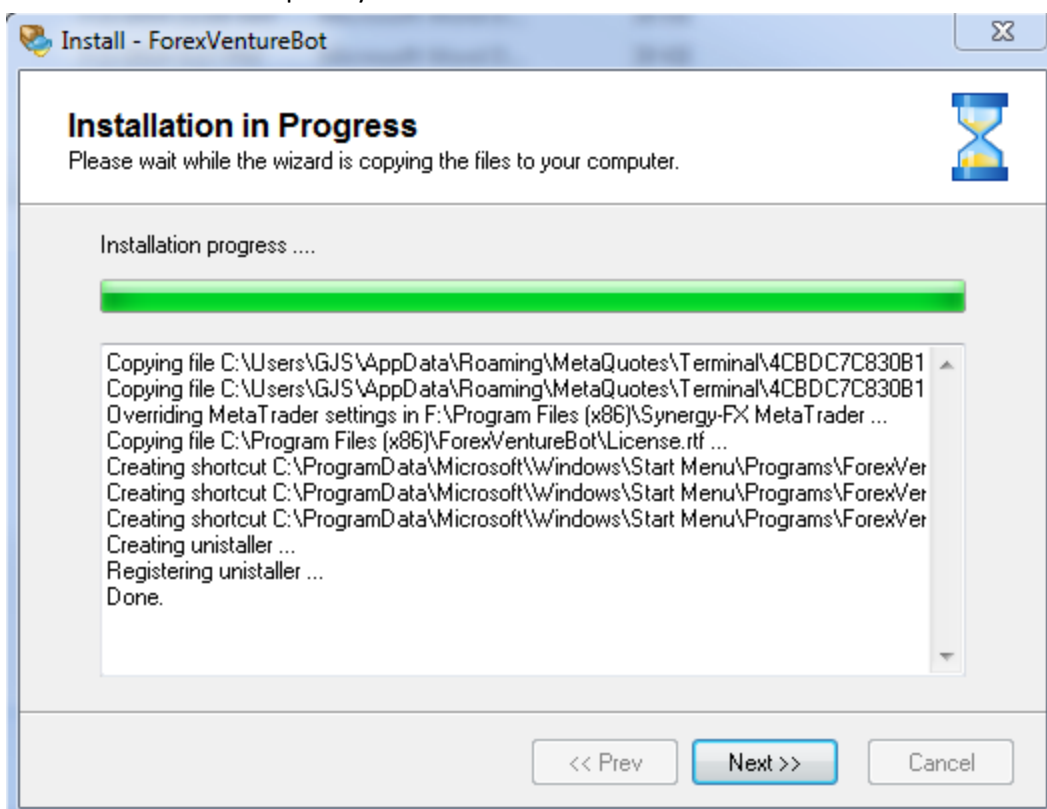

5. Select the MT4 Folder you would like to install ForexVentureBot to and click “Next >>”

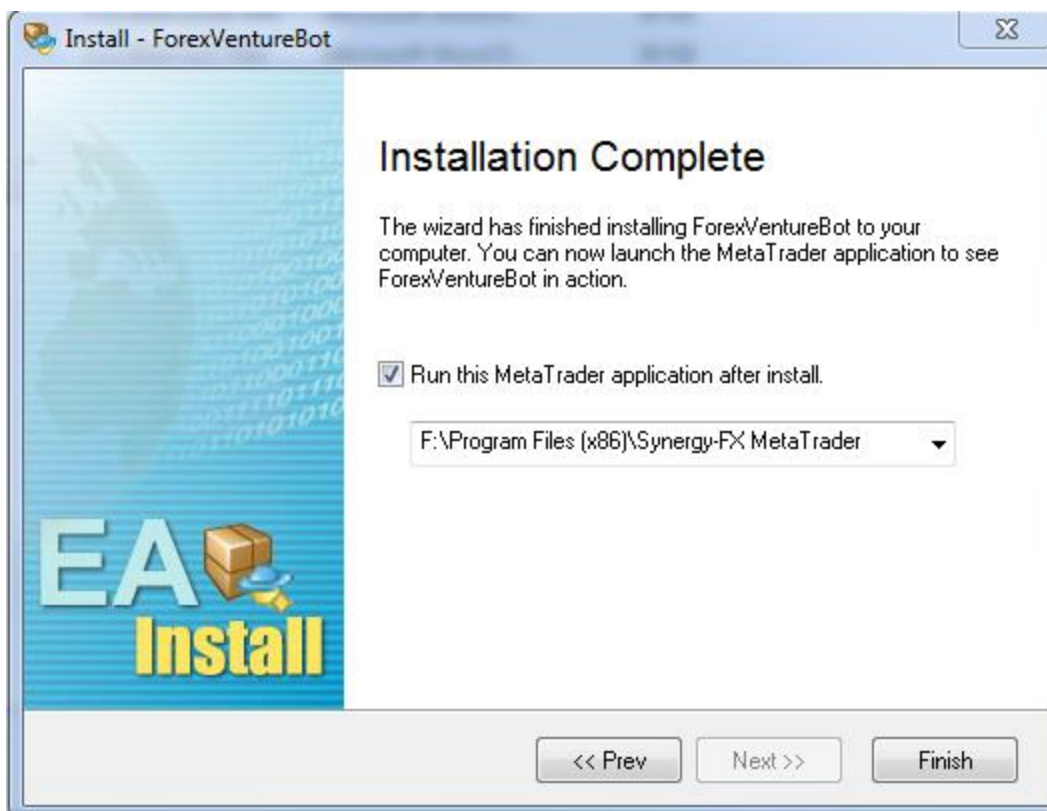

6. Click “Next >>”

7. When the install is complete you will see this screen. Click “Next >>” afterward

8. Click “Finish” to run MT4

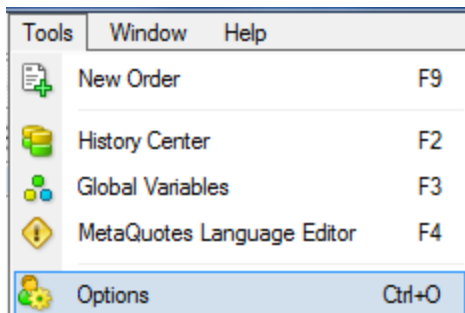

9. You have successfully installed ForexVentureBot!

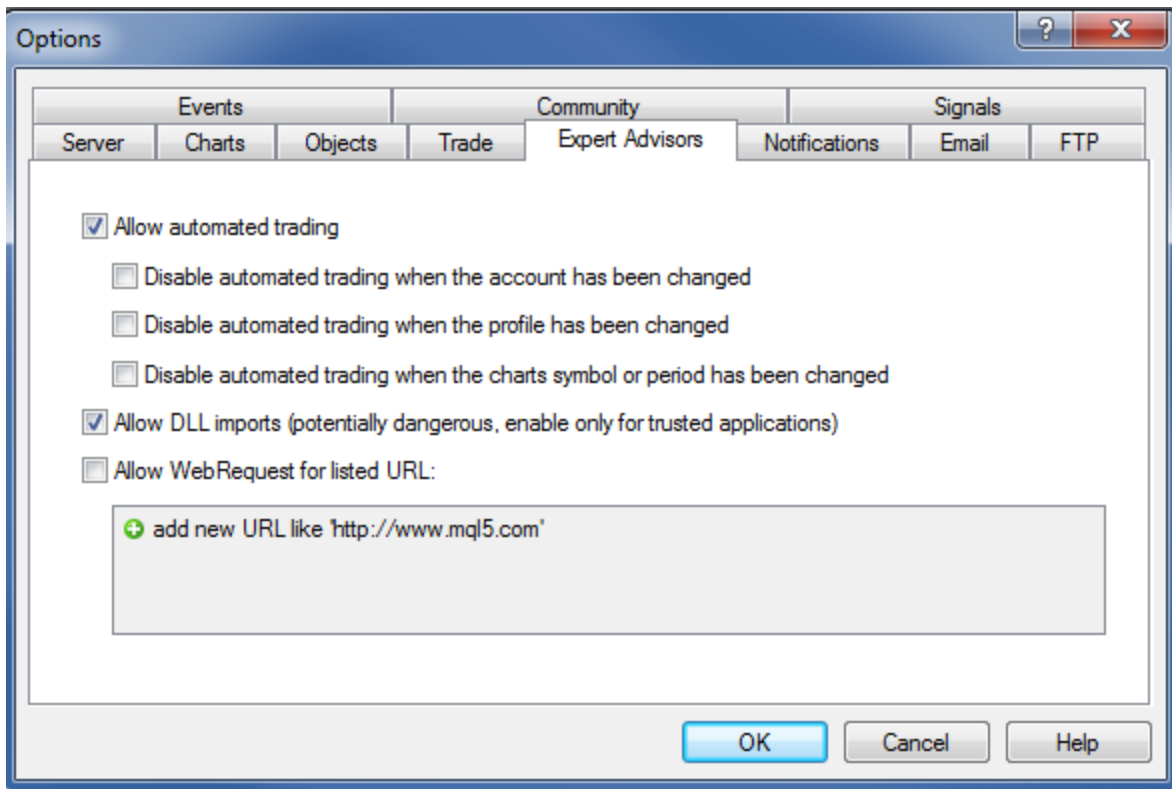

Attaching ForexVentureBot to EURUSD H1 Chart

ForexVentureBot must first be activated before it can be attached to a chart. If you did not perform the activation procedure, please do so now.

1. Open up the copy of MT4 that you installed ForexVentureBot to
2. Goto the options menu by selecting “tools” and then “options” from the task bar.

3. Select the Expert Advisors tab, and make sure your settings match the corresponding image below. Click “Ok” when done.

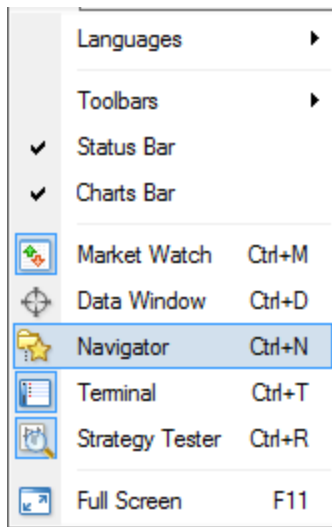

4. Open a new EURUSD chart under “file” “new chart” and select EURUSD

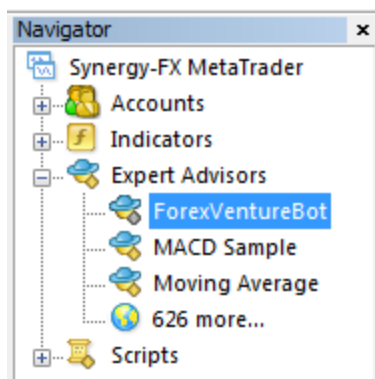

5. Click the chart after it opens and change the timeframe to H1

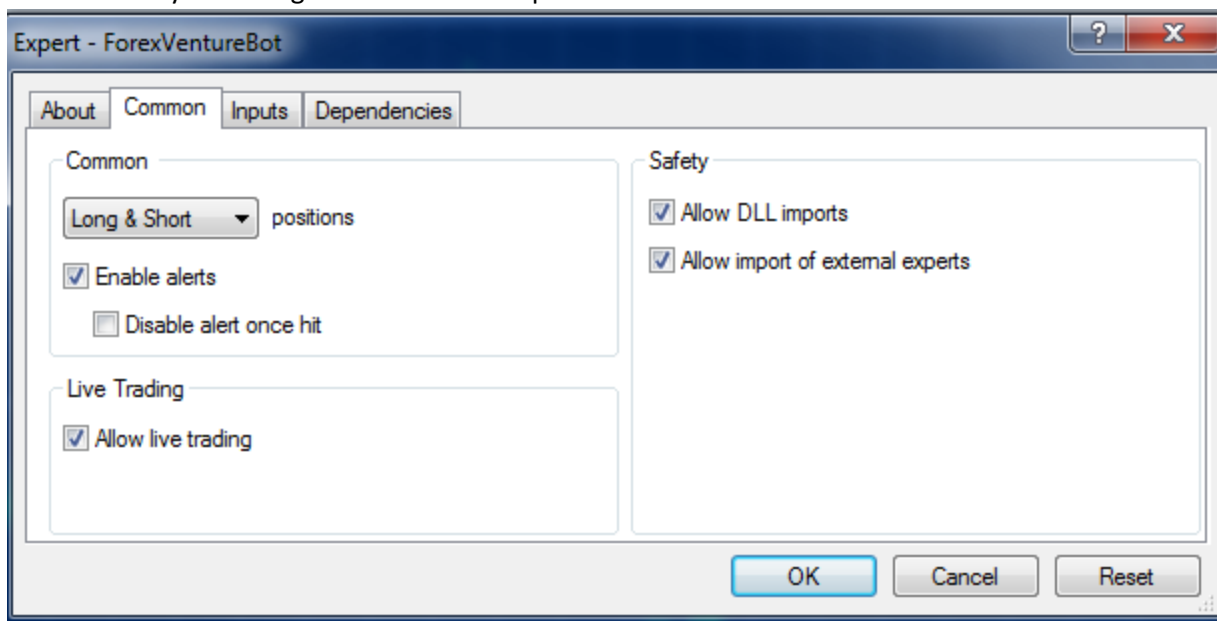

6. Open up the navigator Window by going to “View” and then “Navigator”

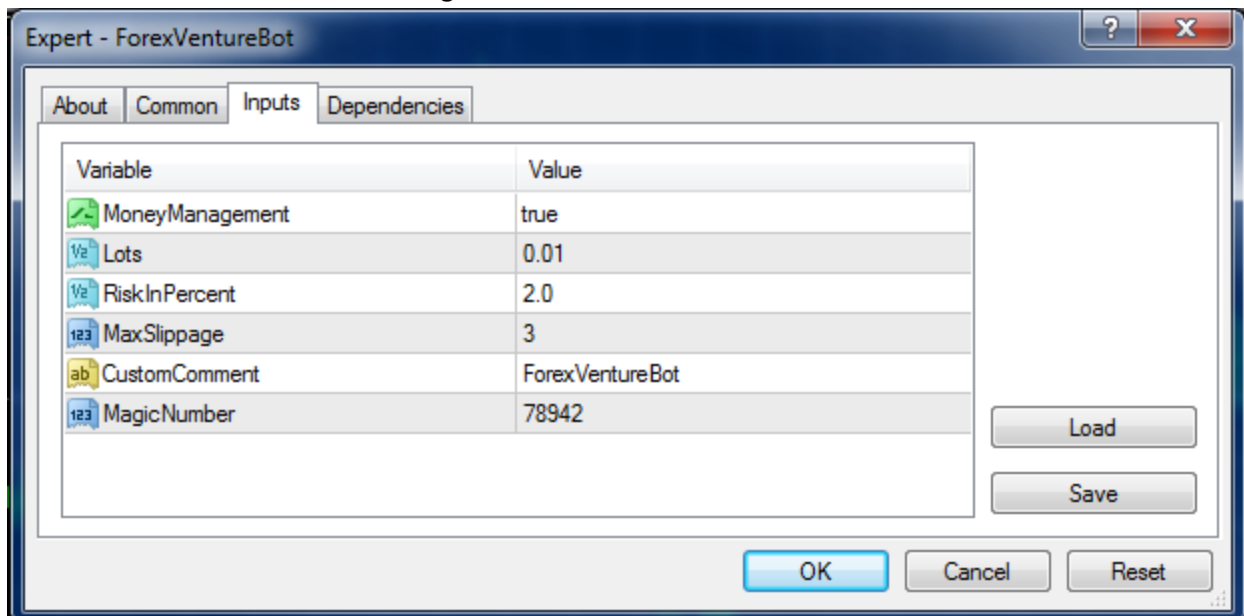

7. In the navigator window, Click and Drag the desired version of ForexVentureBot onto the desired chart

8. Make sure you settings match one of the picture below

9. Select the Inputs tab and enter your desired settings. See the ForexVentureBot Settings section below for more information on each setting.

10. Click ok when done

If you set up your EA properly you should see a chart that looks like this.

This shows that the EA is working. You will not see this display until the market is open

If you do not see this padlock, FVB is probably not working properly.

*If you do not see a smiley face in the top right corner please go back and double check your settings
