Installing the FXSmooth Indicator

IMPORTANT: If you don't have MetaTrader ® installed, please download it from this link:

http://www.alpari.co.uk/files/site_uk/000software/MT4_set_up.exe

Follow the instructions and open a demo or real account. We recommend trading the indicators on demo account before proceeding to real accounts.

➔ **Step 1:** Copy the indicators files EX4 into your /experts/indicators/ folder. This folder is in the folder of the MetaTrader trading platform.

Examples:

If you are using the Interbank FX Trader broker, the folder will be at
C:\Program Files\Interbank FX Trader 4\experts\indicators\

If you are using the Alpari MetaTrader broker, the folder will be at
C:\Program Files\MetaTrader - Alpari\experts\indicators

If you are using the FXDD broker, the folder will be at
C:\Program Files\FXDD – MetaTrader 4\experts\indicators\

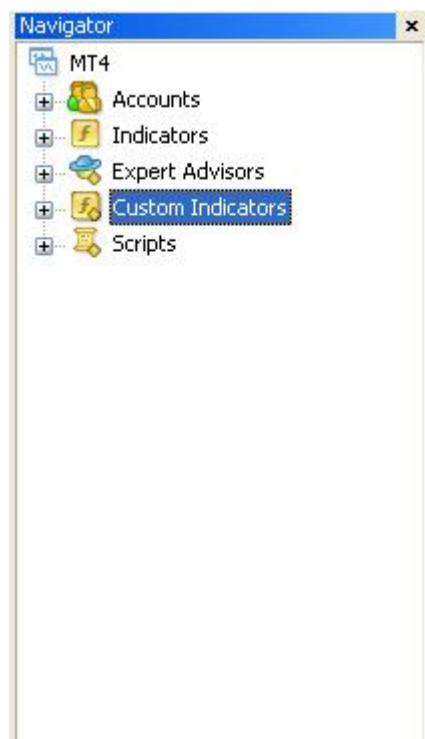

If you can't find your /experts/indicators/ folder, please contact our technical support.

➔ **Step 2:** Open the MetaTrader® platform, and click on View -> Navigator. You can also click on CTRL+N.

Click on 'Navigator'

➔ **Step 3:** A window titled 'Navigator' should appear. Click on Custom Indicators.

The Navigator

➔ **Step 4:** You should see the **FXSmooth** indicators © at the Custom Indicators folder. Double click on both indicators and click OK to load them onto your chart.

FXSmooth Indicator ™

Here is a video showing how you to **install indicators onto the** MetaTrader ® platform:

If you need any assistance, do not hesitate to contact our technical support team.

Using the FXSmooth Indicator

In this part you will learn how to use and trade the FXSmooth indicator.

Recommended Timeframe

The FXSmooth indicator is optimized for 1-hour timeframe, but can as well be used in any timeframe, both for swing trading and scalping.

Generating Signals

The FXSmooth generates signals when it changes colors. A change from Red to Green is a long signal, and a change from Green to Red is a short signal.

IT IS RECOMMENDED to trade only a currency only with his matching version of FXSmooth. This way you ensure that you trade with the most profitable version of the indicator.

Stop Loss

For each signal the FXSmooth automatically calculates stop loss. You will see the stop loss in the alert the indicator issues.

Exiting Trades

It is recommended to exit the trade as soon as the FXSmooth generates the opposite signal.

It is also recommended to use the special FXSmooth Exit indicator to generate exit. Simply exit when the FXSmooth Exit indicator creates the opposite signal.

Trading Statements on the major pairs

Trading statements of the FXSmooth are attached in the package. They are given so you can see that the indicator you are trading with was profitable and that you witness that you trade with an optimized and up-to-date version of the indicator.

Receiving Alerts

To receive automatic sound (message box) alert when the FXSmooth indicator generates a signal, click on Inputs tab and set 'SoundAlerts' to True.

The FXSmooth Indicators can also send emails when it generates trades and/or exit signals. As a default it is turned off. To receive email when the PipsMachine.com Indicator issues signals, do the following actions:

1. Enable Email Alerts. In the '**Inputs**' tab, set '**Email.Alerts**' to True.
2. Click on '**Tools**' and '**Options**'.
3. Click on the '**Email**' tab.
4. Check the '**Enable**' checkbox.
5. Ask your Internet Service Provider (ISP) what are his email server details.
6. Click on '**Test**'. You should receive a test email to your inbox.
