Settings:

The following is the description of the various parameters in the strategy file.

UseIncrementalLotSize = true : This option allow the robot to use money managements.

RiskPerCyclePercentage = 20 : This is the risk percentage of the opened orders in case the trader set the above parameter to true.

TradeOnMonday = true : Allow trading on Monday.

TradeOnTuesday = true : Allow trading on Tuesday.

TradeOnWednesday = true : Allow trading on Wednesday.

TradeOnThursday = true : Allow trading on Thursday.

TradeOnFriday = true : Allow trading on Friday.

MaxSpread = 2.5 : Maximum allowed spread.

Lot_Size = 0.5 : Lot size in case the above parameter for money management was false.

Take_Profit = 5 : Take profit.

Stop_Loss = 29 : Stop loss.

MaxOrders = 7 : Max number of orders.

Magic_Number = 21000 : Used magic number.

Max_Slippage = 2 : Max allowed slippage.

REQUIRE CHANGE

StartTradingTime = 23:00:00 : Start trading time it is best value is 20:00:00 UTC/GMT

EndTradingTime = 23:59:00 : End trading time it is best value is one hour from the start trading time so it will be 20:59:59 UTC/GMT

This is easy to do, go in google and type time GMT. Compare that time to your broker Market Watch time. In this case my broker time is GMT 0.

Forex Broker GMT 0 means I set StartTradingTime to 20:00 and EndTradingTime to 20:59

If your Forex Broker GMT is -2 Then we subtract 2 from 20:00 and we put STT at 18:00 and ETT at 18:59

If Your Forex Broker GMT is +3 Then we add 3 from 20:00 and we get STT at 23:00 and ETT at 23:59

Authenticate

In order to use Forex Fury Live or Demo accounts you have to add them here.

- If you add a live account it may takes a few minutes to work.
- If you stop using a live account by removing it from the chart give the system 30 minutes to recognize that you stopped using the account and then you can add a new live account. If you try to add too many live accounts your account will freeze until we have someone investigate the issue.

You are a **Forex Fury 1 License Member, Forex Fury 2 License Member** with unlimited demo accounts.

Username: Your username is **admin**

MT4 Account Number:

[Submit](#)

The username is easy, this form tells you your username, mine is admin, yours will be whatever it says instead of admin.

Just plug that in.

Next get your MT4 Account Number

To get your MT4 account number go into MT4 and Click on File > Login.

Or look at the top left of MT4, or the top middle of MT4.

Or go into Tools > Options > Server

EXAMPLE IMAGE:

In the example I'm giving you I would put.

Username: admin

Account:9168868

Then I would click submit.

Now we are ready to set up MT4 and drop the software on the chart. Open Mt4.

Make sure Timeframe is M15 for the chart.

Makes sure Autotrading is clicked in and Green.

Go to Tools > Options > Expert Advisors Tab

Allow Automated Trading Ticked.

Allow DLL imports ticked.

Allow Web requests ticked.

Double click in here and add url <http://www.forexfury.com>

Click GBPUSD in market watch and drag it into the open area in the middle. Close the other charts there.

Click on Forex Fury in Navigator Expert Advisors and drag it onto the chart.

Have the common tab ticked like this.

Double click where it says your username, delete that, and put your username in, the one you authenticated and signed up with.

Installed Properly, enjoy!
