

FOREX POWERFUL HBA TRADING SYSTEM-STRATEGY

Installation and Setup

Forex HBA Strategy is a Bundle of plug-ins that requires MetaTrader 4 to function.

If you already have MetaTrader 4 installed, place the following files:

Indicators goes:

into **C:/Program Files/xxxxx/experts/indicators**, where **xxxxx** is the name of your MT4.

For example, the MT4 from FxPro is called **FxPro - MetaTrader**, and the complete

Template goes:

into **C:/Program Files/xxxxx/templates**, where **xxxxx** is the name of your MT4.

After finished restart you MT4 platform for changes to apply.

Entry:

Go short:

1. HBB dots turns into red color.
2. HBA candles turn into red.
3. HBF bars goes below 0 line and turns into red bars.

Go Long:

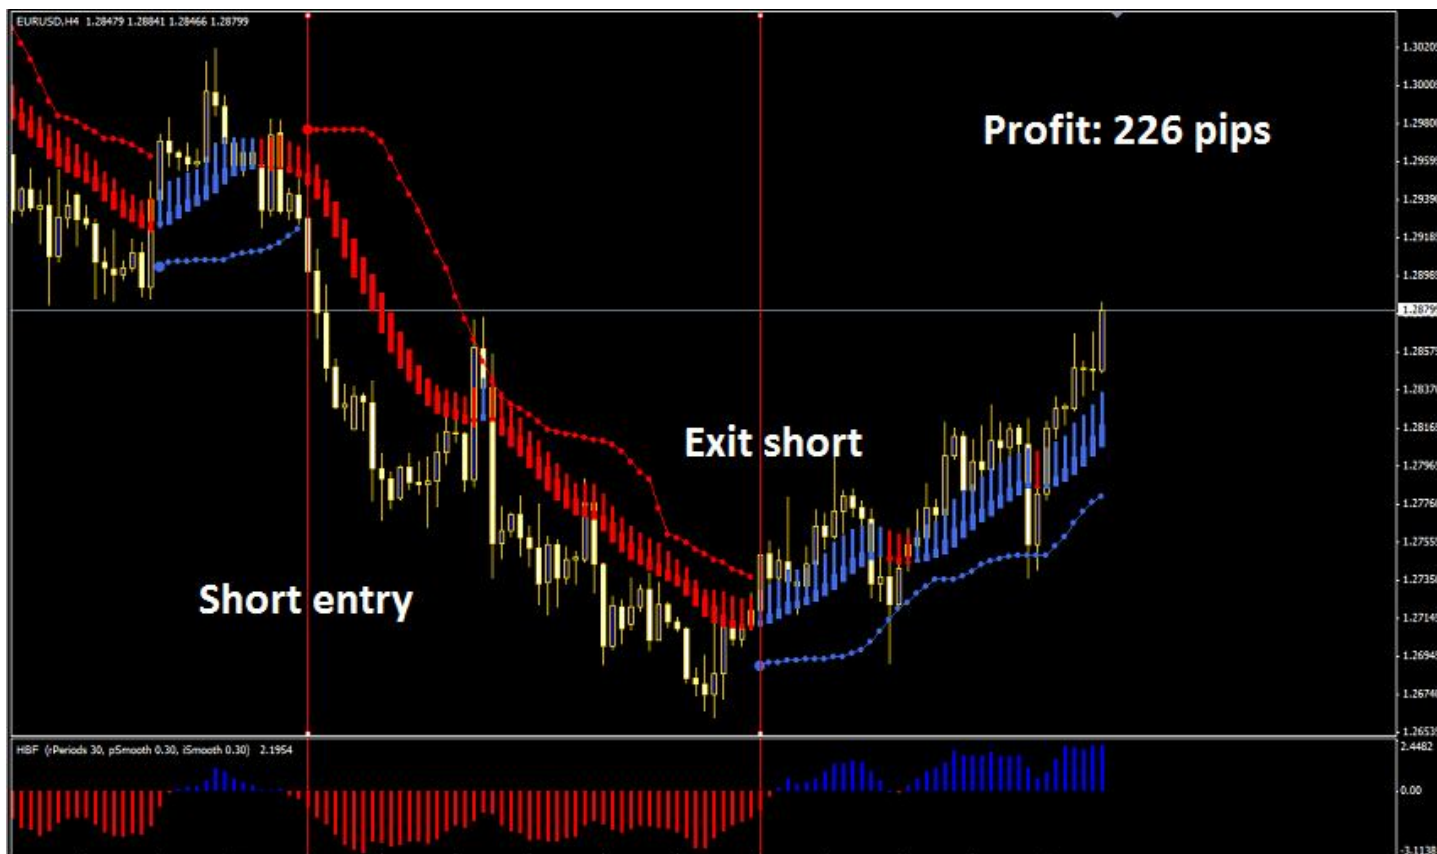

1. HBB dots turns into blue color.
2. HBA candles turn into blue.
3. HBF bars goes above 0 line and turns into blue bars.

Only enter trade with all 3 indicator confirmation for perfect signal.

You should put stop loss on previous candle high or low. Also trailing stop could be applied.

We simply exit trade when HBB indicator changes color against our trade.

Below some chart examples.

Goodluck trading!,
