Bar iPRO v9

Key information EA

Tab 1

- Bar Pro trading method is **very special**, do not use Indicator. Because, it late than current prices, not be exactly as we traded short.
- Bar Pro can make a profit of **0% - 20% on the day** and also can lose 5% on the day. We can set the level of profits and risks based on trading volume.
- Time Trading: **Fully automatic**, no customization required. (It uses the MT4 hours).
- The pair traded: **EUR/CHF, EUR/GBP, USD/CHF**. Because the fluctuation range of the small pair in a day, we are short trade (scalping) of day trading and and make money in the sideways market very easy.
- EA can trade on: AUD/NZD, AUD/CAD, ... in the next version. Special customers are **updated free** of charge, if the customer has purchased the full version before.
- Bar Pro has **two modes** to customize volume, 1 - fix lot, 2 - increased or decreased depending on the volatility of the current market.
- Stop Loss and Take Profit are **all hidden**, to avoid impact from Brokers. Reduce risks when market volatility is too strong.
- Parameters have **been optimized**, you do not need to adjust. But you can change if you like trading with other modes, it is really easy.
- Minimum deposit to secure for EA: **all is good**.
- **More** information about EA:

Bar iPRO v9

Broker and Account

Tab 2

- Bar iPro EA can work well with Brokers have **No Dealing Desk**: STP, ECN + STP. It is very important, please choose Brokers reputable, licensed, quick and easy withdrawal.
- Bar iPro performs **the best** with True ECN accounts. **EX**: iCmarkets, Pepperstone, Tradeview, Vipro, Tickmill, Hotforex, Drawinex, XM, Exness, FXOpen, Tradersway, ... and the same.
- Low/raw spread with commission. Recommend spread **< 2.0 pips** (20 points) and Commission **< 10\$/lot**.
- Platform Metatrader 4 - **MT4**.
- **5** digits price.
- Minimum leverage: **1/50**.
- **Time zone**: EA activities based on MT4 hours. So, you are in any other country, are not the problem.
- **Server**: Can be installed on VPS good 24/5 or install directly onto a computer but noted that the speed ping $\leq 250\text{ms}$.
