

VERGIL DAY TRADER v1.1

Vergil Software Inc.

WELCOME TO VERGIL EXPERT DAY TRADER EDITION.

Thanks for purchasing Vergil Expert Advisor. Vergil Day trader is a unique day trading automated forex trading expert advisor, which is programmed to analyze fundamental events like economic releases and proceeding market movement to identify potential trades.

How to Install Vergil EA

Step 1

Download the “Vergil_DayTrader1.1.zip” file.

Step 2

Right click the zip file, and from the menu select extract here. An Installation files will be created on you extracted location.

Step 3

1. Open “Install.exe” file.
2. Next Button
3. Read license agreement and click next button
4. Choose and installation folder and click Next (you must choose your MT4 direction folder)

Remember to restart your platform when you have installed the files to the respective directories. Once you have copied the files to correct path you will see Vergil EA icon in your Platform, navigator panel under expert advisor.

Deploying EA over Chart

Once you have installed Meta Trader 4 platform and copied the expert advisor files in expert directories, you are ready to trade and put the EA to action. It is advised that you first try the EA on demo account to get comfortable with the ins and outs of the EA.

Step 1

Open Meta trader 4 platform. If it asks you to update the platform then update it to the most recently built. You need to first Login with your demo or real account to test the EA on forward market.

Go to File > Login > Enter Your Login Details

Step 2

You have just logged in your demo or real account and are ready to put the EA to work. All you have to do is just drag and drop the expert advisor from the Navigator panel under expert advisor to the (1M) chart.

Currency Pairs: EURUSD, AUDUSD, GBPUSD, USDJPY, USDCAD, USDCHF

Best Currency Pairs: **EURUSD, GBPUSD, USDJPY**

Drag and drop to EURUSD **1M** chart.

Set the common Properties as shown in the diagram above.

You can also modify the EA parameters by clicking the Input tab, as show in the image below:

Complete instructions on parameters can be found under heading, Parameter Description.

Step 3

If the EA is successfully installed it will show a happy face icon on the upper right side of the chart. If you see a sad face icon make sure you have enabled the expert advisor by clicking the expert advisor button on the tool bar.

You have now installed the EA on chart and it is ready to pick profitable trades at appropriate opportunities. If for some reason your EA doesn't appear to work kindly read all the instructions again.
