FAP TURBO 57 PREMIUM

We know it's been a long time coming, but it's finally here! We are happy to announce the Premium version of FapTurbo 57 that has been optimized and fine tuned for FxChoice only! This newly improved version will only be shared with our Premium Members (to join our list of Premium members, you need to open and fund a live FapTurbo account with MyFxChoice here:

<https://my.myfxchoice.com/registration/?ib=2474>)

While FapTurbo57 achieves good results, the Premium version goes beyond what the normal version is capable of, and has many more parameters and features too. Also, in this version, our focus has been on achieving REALISTIC returns based on the current market conditions of this year, 2012.

So, what's new in FapTurbo 57 Premium?

- Updated to a resilient, robust trading strategy that will ride out some of the worst market conditions
- Implementation of 4 Special parameters (STM, EnCP, OBSTFNum and MEOSTO) that modify the robot's behavior according to various simulation models. These special parameters also allow for the robot's optimization based on computationally-intensive simulations, which yield better results. The

parameters are made available only to allow for the application of future optimized settings. The functions of these parameters will NOT be explained, so please do not email Premium Support asking us what these parameters mean or what they're supposed to indicate. We will not entertain these questions. All we ask is for you to trust us, we know what we're doing 😊

- Modification of **TP (takeprofit) & SL (stoploss)** parameters
- Huge Increase in Performance and Win / Loss ratio. In short: Makes MUCH more profits and way less losses :)
- Implementation of additional security layers to protect your capital from ever-changing, rapid market conditions.
- Updated TrendFilter & Backtesting Daylight Saving dates.
- Broker restriction: From now on, all Premium versions of FapTurbo will not work on any broker EXCEPT MyFxChoice. The simple reason is because, even if you were to run it on some other broker, it will not deliver the kind of results you would get on MyFxChoice alone!

NOTE: For some parameters (especially the new special settings), you will notice that the default value is -1. This value means that the robot will internally choose the best, optimum settings to be applied based on which pair it is trading on

What are the results?

These in-depth modifications once again make FapTurbo one of the MOST profitable and stable FX robots on the market. Since pictures say more than words, here's a series of equity graphs for your perusal:

USD/CAD

The performance of USD/CHF is not worthy enough to be displayed here. Just as it was with the previous version FAPT56, USDCHF continues to be the worst pair that the robot could trade on.

NOTE: We are sure that these performance enhancements speak for themselves. Losses naturally can't be avoided and they are part of trading... but we did what we can to minimize them :) However, for the sake of your lifestyle, please NEVER use money for trading that would have an impact on your day to day life... in other words, please don't bet the farm or trade more than you can afford to lose! ☺
