

Getting Started

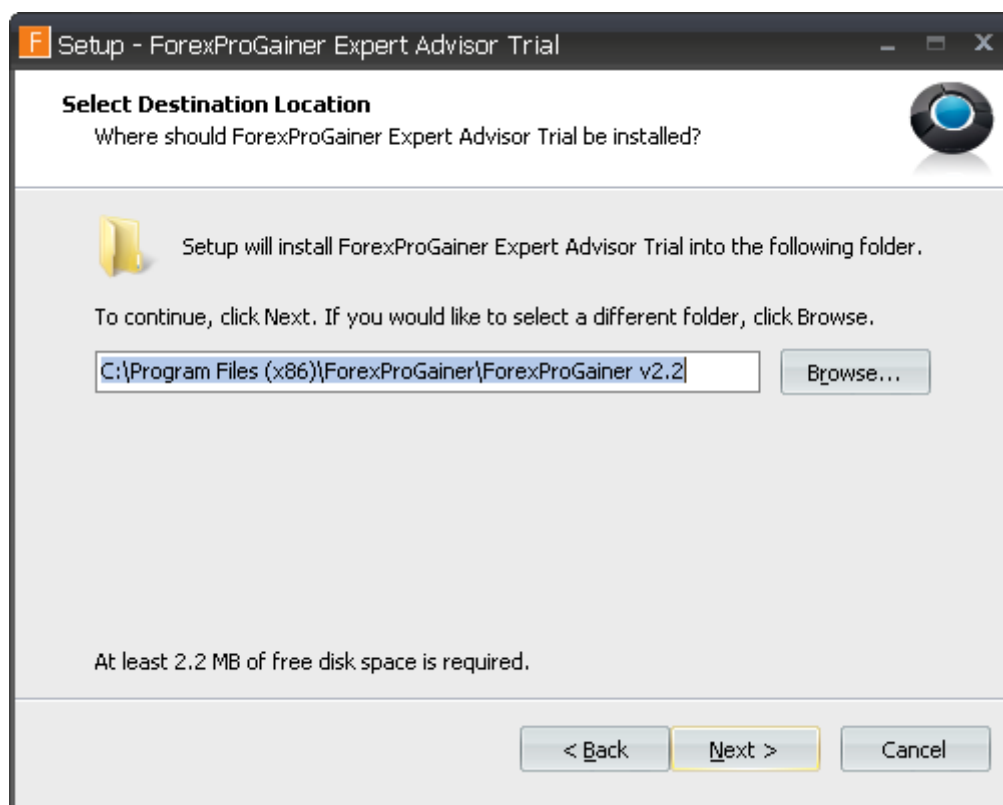

Installing ForexProGainer

To install ForexProGainer EA downloaded at www.forexprogainer.com/download.aspx, run the setup file. You will then be presented with the welcome page:

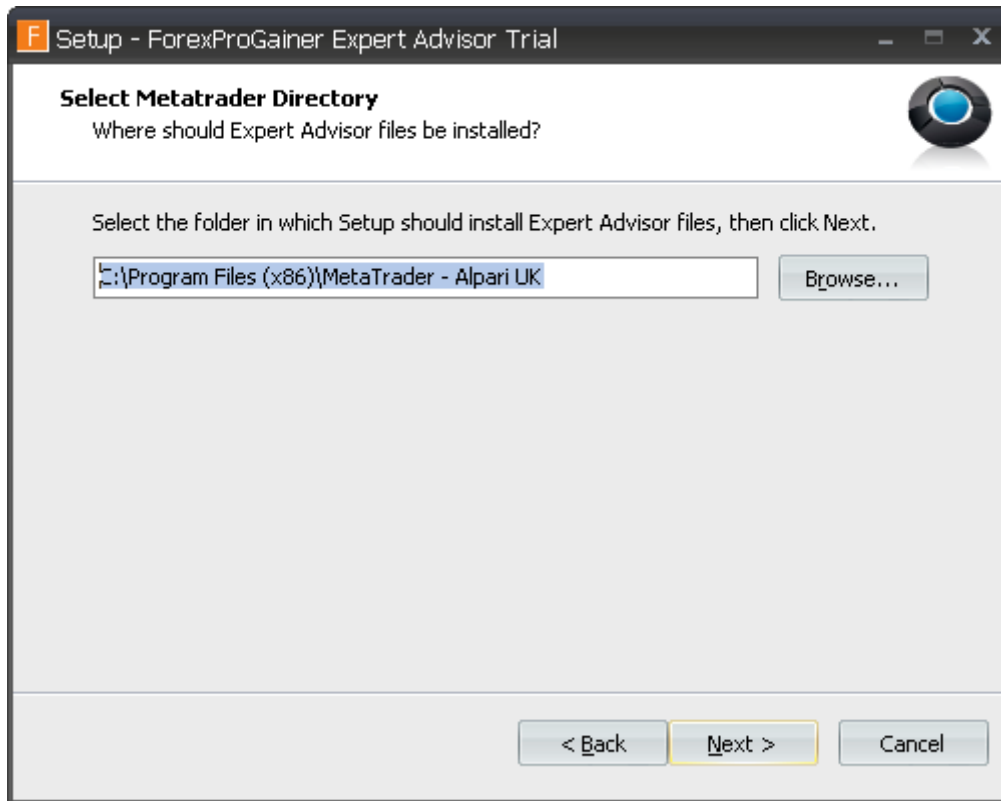

Click on the Next button and you will see the following page:

www.ForexProGainer.com – Make profit as expected

The textbox lets you set the folder in which the help and uninstallation files are installed.

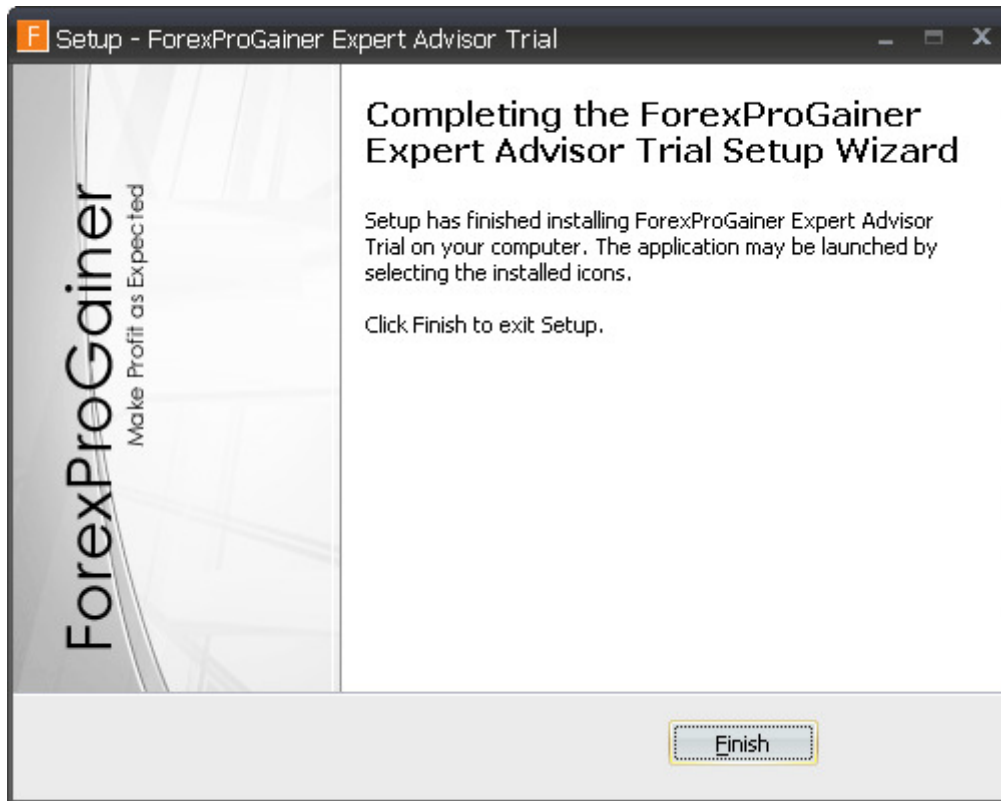

NOTE: This is not for MetaTrader4 folder. Click Next to the Metatrader4 folder selection page:

Suppose you have installed Alpari Metatrader4 to “**C:\Program Files (x86)\MetaTrader - Alpari UK**” and you would like to run the ForexProGainer EA on that Alpari account, you can set the path to that Alpari Metatrader like the image above.

Now click **Next** button and then **Install** button

www.ForexProGainer.com – Make profit as expected

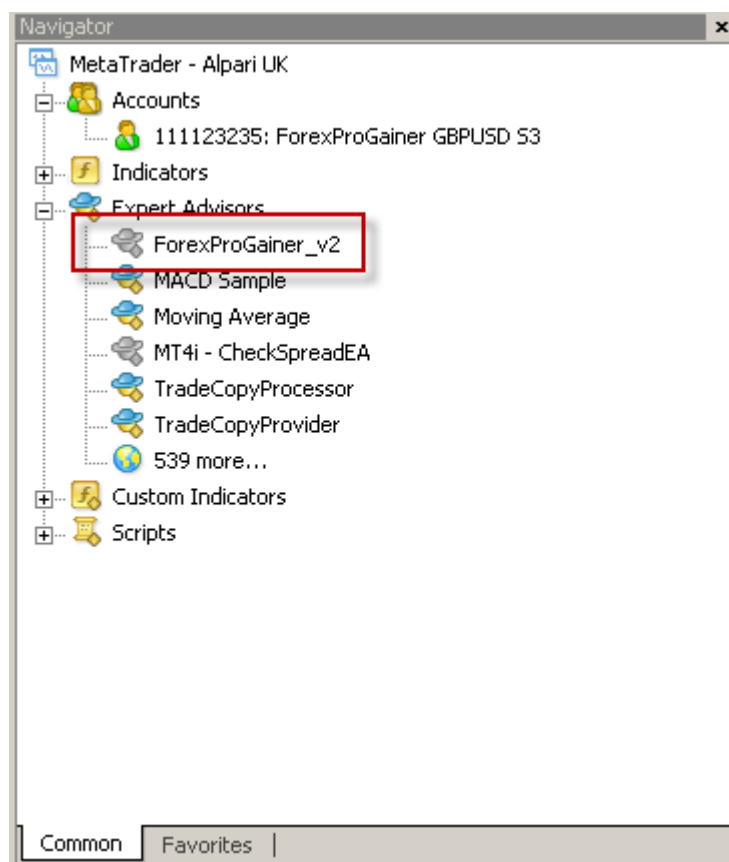

You have successfully installed the ForexProGainer. Before moving to the next step please make sure you have closed and restarted your Metatrader so that it can recognize the newly installed Expert Advisor.

Adding ForexProGainer expert advisor to your MetaTrader Terminal

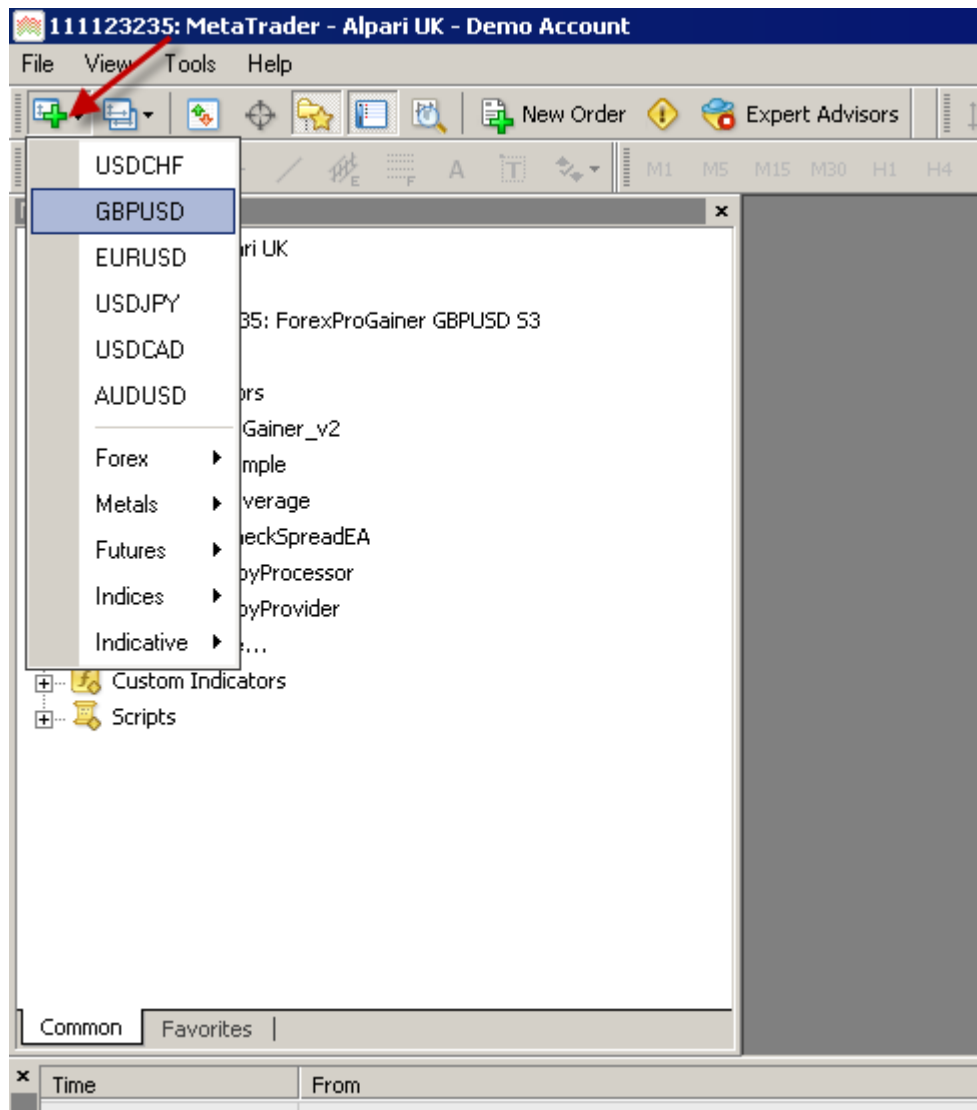

Once the ForexProGainer has been installed successfully you will see it in the Experts list as shown in the picture below.

www.ForexProGainer.com – Make profit as expected

Click on the **New Chart** button on the toolbar to add a new chart to your MT4:

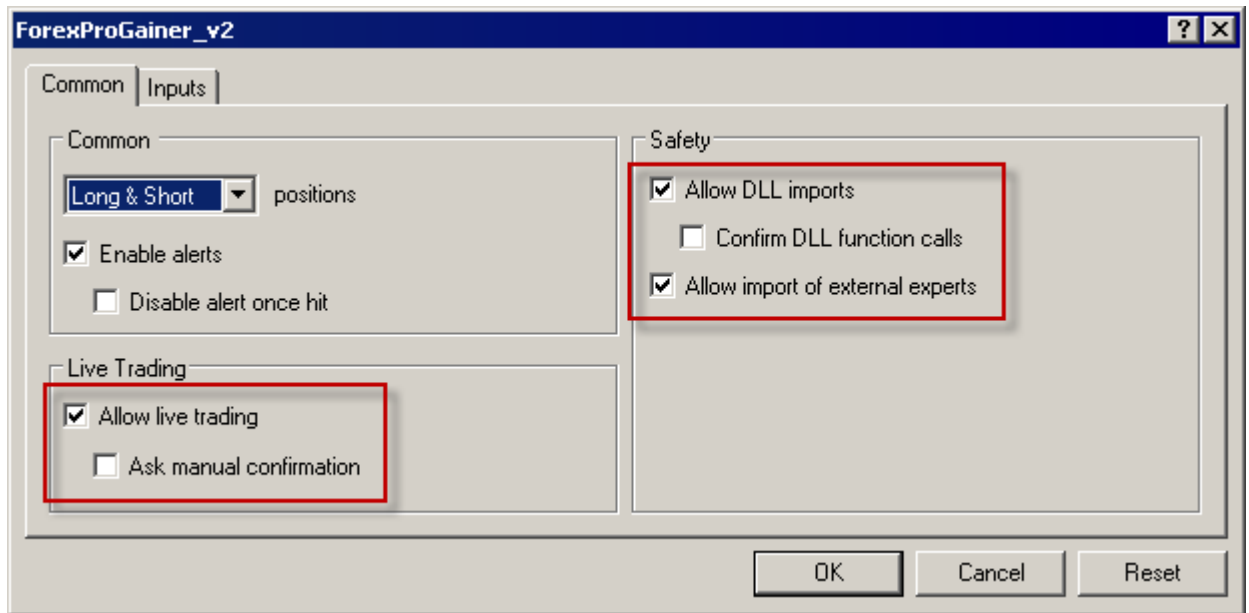

www.ForexProGainer.com – Make profit as expected

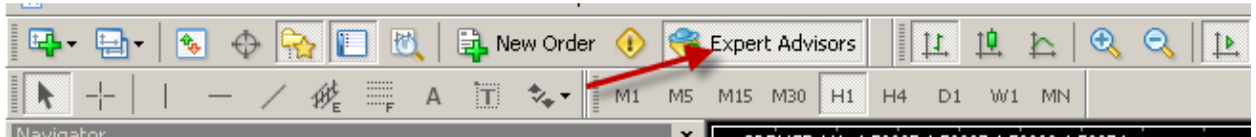

Click on ForexProGainer_v2 item and drag it onto the chart:

You will then see the following dialog:

Please make sure **Allow live trading** and **Allow DLL imports** checkboxes are checked and **Confirm DLL function calls** is unchecked and then click on the OK button. You also need to make sure Expert Advisor is enabled as shown in the picture below:

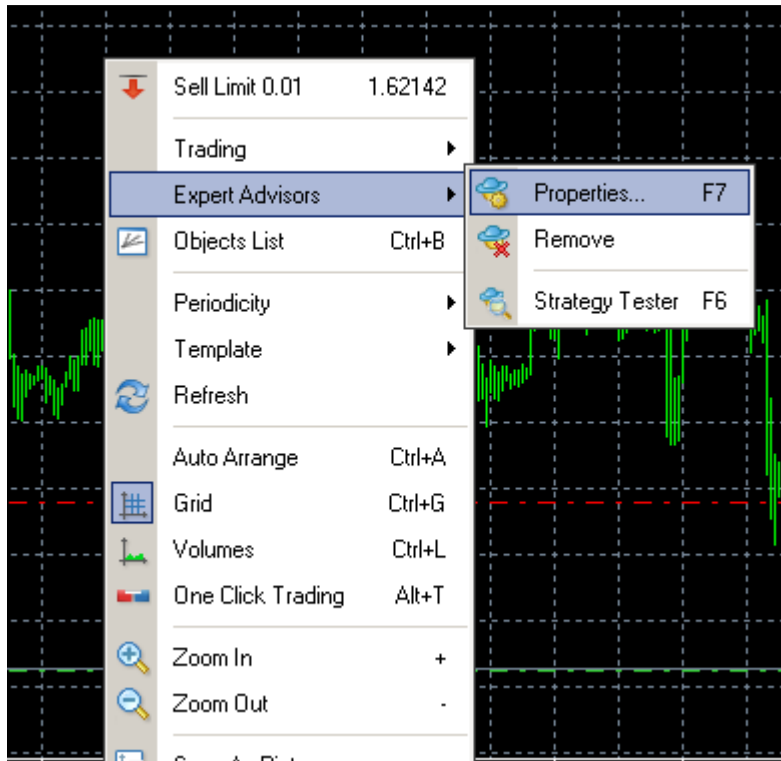

You should see a smiling icon and summary text like the following picture:

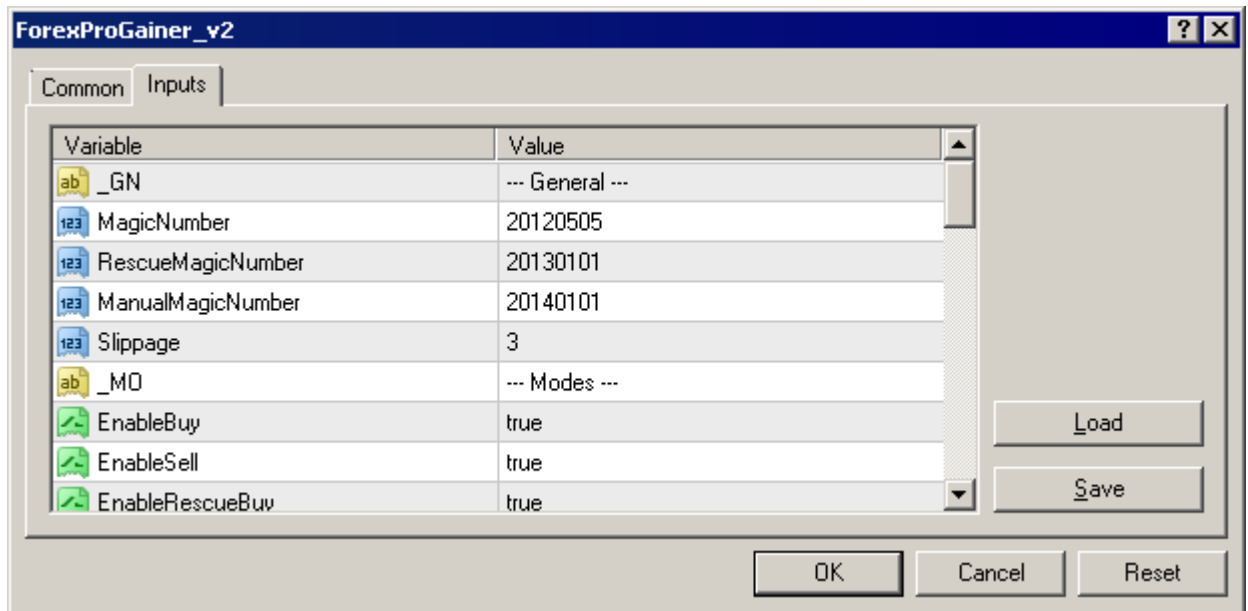

Now sit back and relax the ForexProGainer expert advisor will trade for you. You will see your account grow daily.

ForexProGainer Settings

The default settings of the ForexProGainer is quite safe. If you would like to change the setting like Risk percentage you can open up the Expert Advisor settings dialog by pressing F7 or right-click on the chart, select **Expert Advisors->Properties...**

Then click on the **Inputs** tab:

- MagicNumber: The magic number of the main orders
- RescueMagicNumber: The magic number of rescuing orders (advanced function)
- ManualMagicNumber: The magic number of manual orders opened by the EA (advanced function)
- Slippage: Maximum allowed slippage
- EnableBuy: true if you allow the ForexProGainer to manage buy orders.
- EnableSell: true if you allow the ForexProGainer to manage sell orders.
- EnableRescueBuy: true if you allow the ForexProGainer to manage rescuing buy orders.
- EnableRescueSell: true if you allow the ForexProGainer to manage rescuing sell orders.
- EnableManualBuy: true if you allow the ForexProGainer to manage manual buy orders opened by the EA.
- EnableManualSell: true if you allow the ForexProGainer to manage manual sell orders opened by the EA.
- MaxOrders: Maximum number of allowed orders
- StopLoss: The StopLoss level of each order in pips
- LotsSize: Only active when MoneyManagement option is false. LotsSize specifies the base lots size also known as the first buy or sell order's lots size.

- BuyLotsMultiple: The lot multiplier of buy orders
- SellLotsMultiple: The lot multiplier of sell orders
- MoneyManagement: true if you want the EA to calculate base lots size based on the account balance and RiskPercent setting
- RiskPercent: The percentage used to calculate base lots size when the MoneyManagement flag is true. The formula of base lots size is as follows:
 - $\text{LotsSize} = (\text{AccountBalance}() - \text{PreservedBalance}) * \text{RiskPercent} / 100000;$
- PreservedBalance: Preserved amount of money used for base lots size calculation as shown above
- MaxDrawDownPercentage: Maximum open drawdown allowed for trading in percents of the account balance. i.e. if account balance is 10000, MaxDrawDownPercentage=20 and open drawdown exceeds 20% = 20000 the EA will cut loss all open positions. 100 to disable this feature.
- MaxDrawDown: like MaxDrawDownPercentage but in units of the account currency.
- RescueOrderTotalStart: The number of open buy or sell orders that trigger the rescue operation. The rescue operation will try to open another order to partially close the losing orders in profit. (experimental only)
- ManualSignalComment: If the EA sees a pending order with comment like this value it will open a BUY or SELL based on the pending order type with the same lots size. The newly opened order is managed by the EA.
- UseAutoGMTOffset: true if the EA will automatically detect GMT offset
- GMTOffset: when UseAutoGMTOffset is false, this value is used
- MondayFilter: true if you would like to start trading from the start hour specified by the MondayStartHour value.
- MondayStartHour: Start trading hour on Monday when MondayFilter is true
- TradeOnFriday: false if you don't want to trade on Friday
- TradeOnNFPDays: false if you don't want to trade on Nonfarm Payrolls
- CloseTradeBeforeNoTradeDays: true if all open positions are to be closed before no trading days if either TradeOnFriday or TradeOnNFPDays is set
- WriteLogToFile: true if you would like the EA to write verbose log to a file

FAQs

1. What is the recommended deposit and how much risk should I set?

Here are the list of recommended deposit and risk settings

Deposit	Risk setting that works
---------	-------------------------

\$1,000 USD	1%
-------------	----

\$10,000 USD	0.1% - 10%
--------------	------------

\$100,000 USD+	0.1% - 10%
----------------	------------

2. What is the recommended currency pair?

We recommend GBPUSD pair since it has proved to be the most profitable pair for the ForexProGainer EA.

3. What are the recommended brokers?

ForexProGainer can work well with most brokers (excluding NFA-regulated brokers). We recommend you to choose brokers that support leverage at least 1:200. Here are some brokers:

- Pepperstone
- VantageFX
- FX Choice
- FXCM
- Forex.com
- instaforex.com

4. Do I need to change any settings when my balance changes?

Normally with MoneyManagement set to true, you dont need to change anything. The EA automatically calculates appropriate lots size based on the RiskPercentage setting. If you want to fully control the base lots size (the first order lots size), you can set MoneyManagement = false and LotsSize to the desired lots size.

5. Do I have to let ForexProGainer run all the time on my computer?

You should keep ForexProGainer EA running in your MetaTrader program the whole day. Forex Warrior should keep working 24 hours a day from the market opening on Monday to the market closing on Friday. For your convenience you can run your Metatrader program that has ForexProGainer installed on a VPS to keep the EA online and trading all the time.

6. How often does ForexProGainer trade?

All the time. ForexProGainer has about 3-4 trades per day.

7. How many accounts are included in each license?

Depending on what type of your license is you have 1 live and 1 demo accounts with the Standard license, 3 live and 3 demo accounts with the Pro license, and 9 live and 9 demo accounts with the Ultimate license. For more information please see our purchase page.

8. How to activate my license?

After you complete your order you will receive an email containing a serial number that you enter to the SerialNumber field of the EA setting tab. Once the serial is correct you will see your license status on your Chart.

9. How do I receive my full money if I'm not satisfied?

We are very confident in the EA's results. If for some reason you are not satisfied and want to get back your money you can send us a request via email within 30 days from the purchase date.

10. How to contact your support team if I have questions?

Send us a message to support@forexprogainer.com or via our [Contact Form](#).
