

KGB Scalper

Hello, do not be scared to see these strange characters, it is not defective or damaged.

It is simply programmed in the RUSSIAN language, and the characters are not shown in RUSSIAN.

It works perfectly, 100% guaranteed.

It is a money-making machine, with a very low risk.

WARNING:

PLEASE, DO NOT TOUCH THESE PARAMETERS UNDER ANY CONCEPT. IT WILL BE UNDER YOUR RESPONSIBILITY.

Simply load the presets that are sent for the appropriate account size.

Important:

The presets are sent for each currency pair. You do not have to do absolutely anything else.

If your account is 2000 USD, please upload the settings for each currency pair, which are in their corresponding folder. (\$ 2000)

MY RECOMENDATION

For the management of a low risk:

If your account is 6000 USD, I recommend loading the presets of the 3000 USD account. The risk drops to 50%.

If your account is 2000 USD, I recommend loading the 1000 USD account presets. The risk drops to 50%.

It works in 7 currency pairs, in Timeframe M1:

EURUSD, EURJPY, EURGBP, AUDJPY, AUDUSD, GBPUSD, USDCAD

Add the Expert Advisor to each graph, in **Timeframe M1**.

It works when the market has a lot of liquidity. It takes into account supports and resistances in 4 hour graphics. That's why it's so profitable.

It has a very low drawdown, with a very low risk.

There are days that do not work, there are simply no opportunities. There are days that you work a lot, there are many opportunities.

Please, do not share this EA with anyone. It's too good for it to be in the hands of many people. If the broker realizes, will do everything possible to lose money, will end up closing your real account.

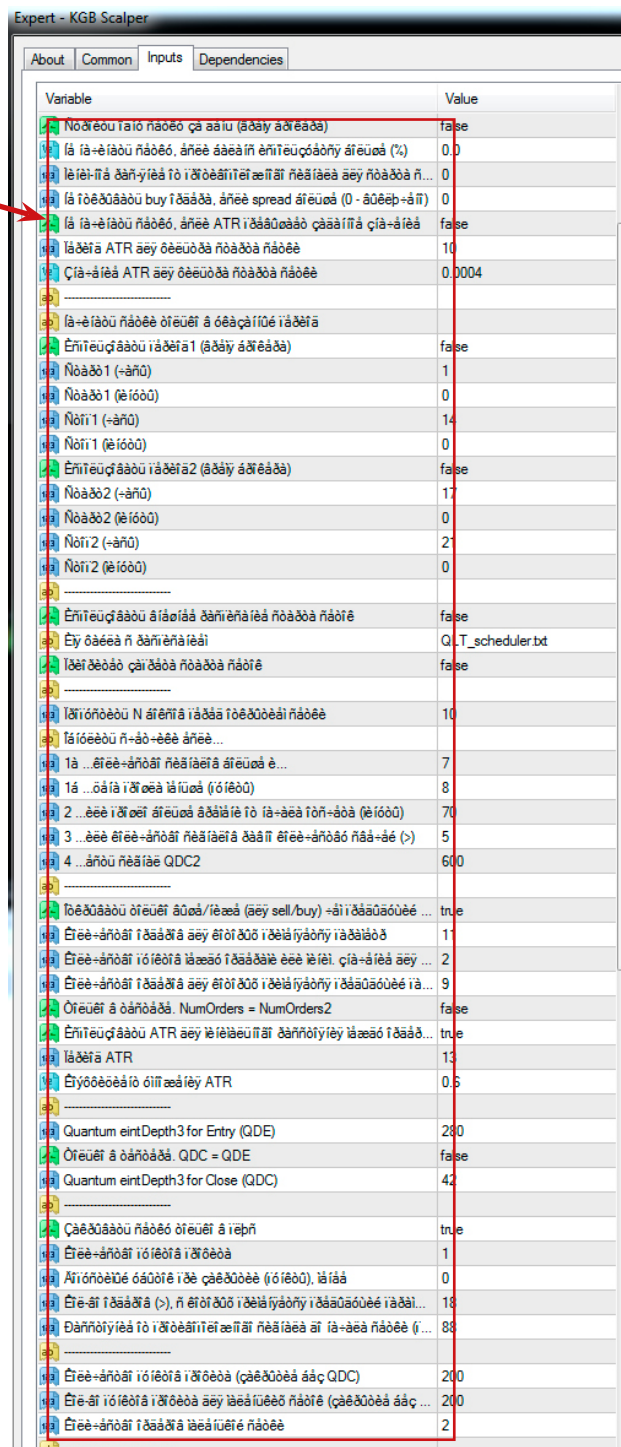

I tell you for other similar experiences.

Broker Recommended:

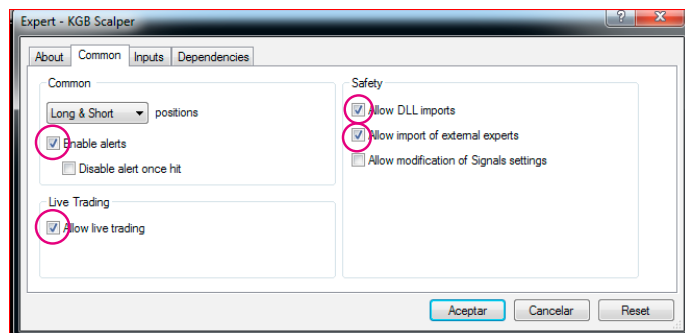

IC Markets

Recommended leverage 1: 500 or higher

You need very low spread
