

Hedge Scalper User Key

Please remember that if you purchase the EA you will get a user key via email, then you will need to put that user key into your EA inputs “User License Key” and then the EA is going to work. And if you haven’t purchased the EA, then you don’t need to do anything, because its on trial and let the “trial” keep written. Do not remove it and do not guess any other key.

What happen that if you guess some value and try it in the EA, you will be blocked on 3rd try. Because you can do it only one or two times and then the EA won’t work on your system. Hope you understand.

And if you have already purchased the EA, you don’t need any other EA file, keep the same file on your system and you will get the license key. The given key may not be working instantly after you receive it. It may take upto 12 hours to be activated on server.

If still there is any question, you can write us on our website or email us.

Thanks.
