

Indicator Installation

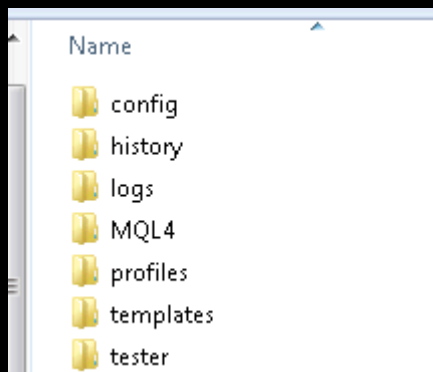

Installing the Indicator file:

To install the file into your mt4 software you need to open the data folder of MT4 by clicking on “File -> Open Data Folder”

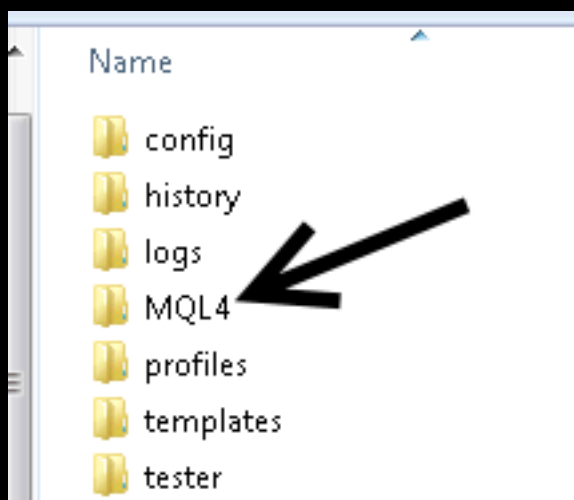

After that a windows explorer instance opens:

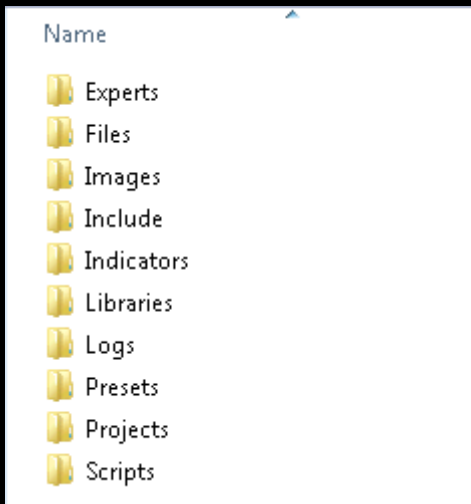

Next you need to navigate into the MQL4 folder:

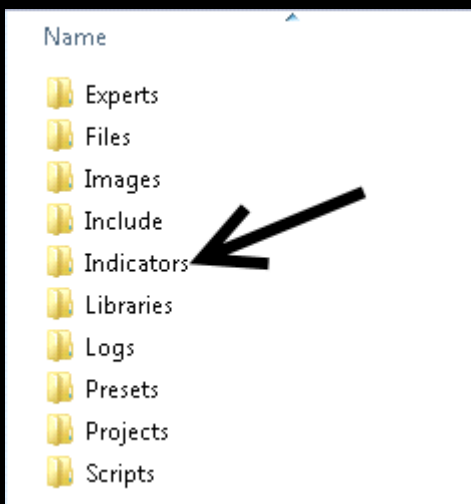

Then you will see following folder structure:

The indicator file needs to be copied into the “Indicators” folder:

After that you need to restart MT4, then the new indicator will appear in you ‘Indicators’ list.

That’s it, you’re done. Happy Trading 😊
